

# The Waterous Band Re-Saw

## THE BEST PRACTICE

in the large Saw Mills of to-day is to use a **Band Mill**, and in connection with it a **Band Re-Saw**. By means of the Re-Saw the capacity of the Mill is nearly doubled, and with but a slight increase in the cost of operating it. Then in box, furniture and other factories, where there is splitting or re-sawing to be done, a **Band Re-Saw** not only does more work in a given time than any other machine, but works more economically, as it produces a minimum of saw kerf. If you have re-sawing to do, let us hear from you; we will be pleased to give you further information.

## The Dixie Hand-Feed Shingle and Box Board Machine

The Most Desirable Hand-Feed Shingle Machine ever offered.

It possesses all improvements in the way of simplicity, durability, and quick and accurate adjustment. Carriage is made of Bicycle Tubing, light and stiff. Only one Screw Adjustment for Changing Tilt, viz., Hand Wheel in front of Machine.
