THE LATEST FREAK OF AMERICAN FASHION

Strange and varied colors have appeared in the dress of the prominent society women who are seen about "Hilltop Inn" or the old Casino during the morning hours at Newport. Chiefly are the variety of shades found in the new patchwork skirts that are the wonder and delight of the season. Photo shows Miss Violet King, of New York and Newport, resplendent in one of these skirts, made of violet and white, with which she wore a lavender sweater.

THE STORY OF MUENTER

Man Who, as Frank Holt, Shot Morgan

THE DEATH OF HIS WIFE

Arsenic in Stomach Found After Husband Had Left Cambridge For Chicago—He Was Never Found

(Boston Globe)

Enrich Muentzer, Frank Holt, name Muentzer is believed to have assumed, was a former Harvard instructor and came to Cambridge in 1904 with a degree from the University of Chicago and a record of service as instructor in the University of Kansas at Lawrence, Kan. Muentzer came primarily to study for a degree of Ph. D. from Harvard, and for a course in German philology. He received an appointment as instructor in German in the elementary courses.

With him came his wife, who was Leone Krebs of Chicago, and their daughter, then little more than a year old. They boarded at first at 63 Oxford street.

Muentzer was an indefatigable worker, and did all he could, by tutoring, to eke out the \$800 a year he received from the college. Everybody who knew him said that he seemed unusually fond of his wife.

In December, 1905, he hired the top apartment in the house at 107 Oxford street and "set up housekeeping," taking F. E. Bryant as a lodger.

Mrs. Muentzer was to become a mother for the second time in April, 1906. She was a Christian Scientist, and Muentzer engaged Mrs. Henry C. Nickerson of Winchester, a Christian Science leader, to attend his wife. Some little time prior to Mrs. Muentzer's confinement Mr. Muentzer also engaged Mrs. Edith Chase, a Christian Science nurse. Doctor withdrew from case.

Mrs. Muentzer, however, became dissatisfied with the results of the treatment.

At midnight on the night of the 13th, Mr. Muentzer told the nurse to get some rest, saying he would watch by his wife the rest of the night. At 9 a. m. he came to the nurse again, saying, "It is all over. My wife has died." Mrs. Chase afterwards said that rigor mortis had already set in, and that the body was so cold that she believed death had occurred several hours before.

A. E. Long, the undertaker, whom Muentzer called in, became suspicious as soon as he saw the conditions. Before he would touch Mrs. Muentzer's body, he telephoned to Medical Examiner Swan.

Dr. Taylor, from whom Muentzer had refused to issue one, and had also telephoned Dr. Swan.

The medical examiner thereupon held an autopsy, and found enough to warrant him in rendering the verdict that Mrs. Muentzer's body and sending them to Dr. Whitney, the medical school toxicologist.

Arsenic in Wife's Body.
At this happened on April 16. That evening Muentzer told the undertaker, Mr. Long, that he had received word from Mrs. Muentzer's parents in Chicago and had changed his plans. He now agreed to take his wife's body to Chicago for burial, and urged haste in preparing it, in order that he might leave Boston at two p. m. the next day.

Mrs. Bertha Derick, a neighbor of the Muentzers, offered to help the Harvard instructor through his trying time. She did not know him personally, but was a woman who gave her whole time and experience to helping others, especially women and children. She offered to go to Chicago, taking care of the child.

Next day Medical Examiner Swan issued the death certificate, ascribing a rupture of the stomach, following childbirth, as the cause, and that afternoon Muentzer, Mrs. Derick and the two little children, left for the west with Mrs. Muentzer's body. Muentzer left all his effects in his flat, except for a little clothing.

In Chicago, Muentzer was so depressed and nervous that he could not go to his wife's funeral. He made arrangements with his wife's family to take charge of her children, and then disappeared. Letters to his colleagues on the Harvard faculty were incoherent and rambling.

Within ten days Dr. Whitney reported to the medical examiner that he had found large quantities of arsenic in the stomach taken from Mrs. Muentzer's body; the district attorney ordered the police to arrest Muentzer and the search for him began.

traced as her time approached, and her husband twice called on Dr. H. S. McIntire of 4 Garden street, Cambridge. Dr. McIntire found her normal. He left prescriptions and directions, but when he found that they were not being followed he withdrew from the case.

Mrs. Muentzer gave birth on April 6, 1906, to a healthy, well-formed girl baby, already set in, and that the body was so cold that she believed death had occurred several hours before.

At midnight on the night of the 13th, Mr. Muentzer told the nurse to get some rest, saying he would watch by his wife the rest of the night. At 9 a. m. he came to the nurse again, saying, "It is all over. My wife has died." Mrs. Chase afterwards said that rigor mortis had already set in, and that the body was so cold that she believed death had occurred several hours before.

A. E. Long, the undertaker, whom Muentzer called in, became suspicious as soon as he saw the conditions. Before he would touch Mrs. Muentzer's body, he telephoned to Medical Examiner Swan.

Dr. Taylor, from whom Muentzer had refused to issue one, and had also telephoned Dr. Swan.

Muentzer left all his effects in his flat, except for a little clothing.

In Chicago, Muentzer was so depressed and nervous that he could not go to his wife's funeral. He made arrangements with his wife's family to take charge of her children, and then disappeared. Letters to his colleagues on the Harvard faculty were incoherent and rambling.

Within ten days Dr. Whitney reported to the medical examiner that he had found large quantities of arsenic in the stomach taken from Mrs. Muentzer's body; the district attorney ordered the police to arrest Muentzer and the search for him began.

In Chicago Mrs. Muentzer's family disagreed sharply as to the possibility that each Muentzer had poisoned his wife. It was just at the time of the San Francisco earthquake, however, and the conditions in the far west—the man was expected to go to relatives near Los Angeles—made it difficult to trace anybody's movements in the hurry-burly investigation brought out a good many odd facts concerning the man, however. One was that he had attempted to create a new universal language.

Her mother, on the other hand, said that it was impossible, and cited his devotion to Leone.

Muentzer's own sister, Miss Bertha Muentzer, who was a school teacher in Chicago, dropped her work and came to Cambridge. She declared at once that "My brother is innocent of any crime. He never tried to kill his wife in Chicago, he is not insane and he is not a murderer."

Sister was never found, though a watch was kept for him in many cities. NEW GUN FOR SUBMARINES

Three-inch Weapon of Disappearing Type For American Under-sea Craft

Washington, July 10.—A three-inch disappearing gun for submarines has been perfected by the Navy Ordnance Bureau. Secretary Daniels announces it and in the future all American under-water craft will be equipped with such weapons for surface fighting.

Mr. Daniels said every test had resulted satisfactorily and that within ten days the gun and its carriage would be sent from the Ordnance factory here to New York for mounting on the new submarine M-1 under construction at the Electric Boat Company's plant.

The carriage, it is explained, operates like those of disappearing guns in shore batteries. The rifle is raised through ports to the deck by electric machinery and after firing is carried quickly back into its place by its own recoil, the same force closing the water-tight hatch as it appears.

For nearly two years naval experts have been working out the problem of developing a weapon for the use of submarines when cruising on the surface, which would not delay the clearing of decks for diving.

The increase in size, speed and cruising radius of submarines in the last few years has made it almost imperative that they carry armament in addition to their torpedo tubes. The German U boats mount powerful little rifles as they have demonstrated recently by shelling British merchantmen attempting to escape after being halted.

No definite announcement has been made as to how many submarines now in the service would be provided with guns, but Secretary Daniels said that so far as possible all the vessels would be so equipped.

The new gun is made shorter than the regular three-inch navy rifle, to make space limitations. This reduces its range somewhat, but it has been fitted for very high angle fire, which will give some chance for use against aeroplanes. The big cruiser submarines authorized by the last congress probably will be armed with two or more rifles possibly of four-inch calibre, although a final decision on this point has not been reached.

Little Stories from the Front

"After You with the Tin."
A war always gives rise to a number of stories, good, bad and indifferent, amusing and otherwise. This one has the merit of being true. At a certain place in France, there was a battery of field artillery, who, in addition to receiving the attention of the enemy in the shape of "Black Maria," "Coat Boxes" and other missiles, were driven to desperation by a certain small unmentionable insect. One day a lucky gunner had a present from his thoughtful sister—a tin of "KRATINGS." That did it. There was a general cry of "After you with the tin," and that gunner's popularity was phenomenal. H

Puff Biscuits

To two cups of flour add two teaspoons of baking powder and a pinch of salt and sift all together. Beat one egg add half a cup of sweet milk and make dough thick enough to roll out. Cut as for biscuits, brush over with melted butter and bake in a quick oven.

Welds Rarebit

Melt 2 tablespoons butter, add 1 tablespoon flour, 1-2 teaspoon mustard, 1-4 teaspoon salt. Mix together and add cup milk and when hot add 1 cup cheese, cut thin. When melted and just before taking from the stove add 1 beaten egg. Serve on crackers.

Sponge Gingerbread

One-half cup sugar, 1-2 cup molasses, 1-2 cup milk, 1 egg, 1 teaspoon soda, 1 of ginger, 1 tablespoon butter, 1-2 cups flour. Will make 12 cup cakes and nice frosted with chocolate.

Chocolate Custard Pie

One pint of hot milk, 2 eggs, 1 ounce of chocolate, 1-2 cup of sugar, salt and vanilla. Shave the chocolate and put into a small pan with 3 tablespoonsful of the sugar, and 1 of boiling water. Cook till smooth, beat together the eggs, 2 tablespoonsful of the sugar and salt, add the hot milk into which has been poured the dissolved chocolate and vanilla, and strain into the crust. Bake till firm about half an hour.

Banana Sandwich

Two bananas sliced and marinated in two tablespoons of marshmallow, lemon juice, 8 tablespoons of thick cream sweetened with honey. Spread the bread with cream and honey, put the banana between.

Sour Milk Cake

One-half cup butter, 1 egg, 1 cup sour milk, 1 scant teaspoon soda, 1 teaspoon cloves, cinnamon and allspice, 1 cup raisins or currants, 1-4 teaspoon salt, add a little citron if you have it.

Avoid All Danger From Cow's Milk For Baby

Not only is cow's milk, modified at home, unsuitable for baby's present needs, but in the summer months it is the cause of serious troubles. Doctors tell us, too, that the germs of various diseases are introduced into the system by cow's milk.

One must not only give baby what is best now, but consider the summer that is coming and baby's future.

The difficulties of the mother who has to hand-feed baby are serious, and she cannot do better than to give him

'Allenburys' Foods

The sixty-page booklet "Infant Feeding and Management" will tell you about these foods and give valuable guidance to help keep baby free from the dreaded summer troubles.

The ALLENBURY CO., Ltd., Toronto.
