KADUNA IN PORT AFTER FOUR WEEKS BATTLE WITH STORMS

The long overdue South African liner Kaduna, under the command of Captain Purdon, arrived in port last evening after twenty-eight days and eleven hours of what the captain termed "the worst weather I have ever experienced." The Kaduna left Cardiff on January 28 and for the greater part of her voyage was tossed and buffeted about by strong winds and mountainous seas that threatened to tear her machinery and boilers from their supports. When the steamer was 800 miles west of Falmouth one of her funnels was smashed and she was holed for sixteen hours until temporary repairs were made. She ran into a hurricane on February 1 and again speed was reduced and the vessel wallowed in the trough of the sea, her decks inclined some times more than forty-five degrees, the boat deck was lifted by the wind from the side walls. The hurricane drew the guy bolts from the funnel, the tarpaulins on the hatches and the canvas on the bridge were torn to ribbons, and only with difficulty was the funnel saved. From February 8 to February 18 the Kaduna made out forty miles. Captain Purdon has been to St. John before in command of the South African steamer Menai. The Kaduna is docked at Long Wharf and will load for South Africa.

RECENT DEATHS

Michael Hanlon passed away in the early hours of yesterday morning at the residence of his sister John Hughes, 107 Hilyard street. He leaves, besides his wife, four sons, James, of Fairville; Joseph, of Boston; Charles, of Dakota; and William, of St. John; two daughters, Mrs. Daniel McCann of this city, and Mrs. Jas. Logue, of Winchester (Mass.). Two sisters, Mrs. Catherine Dolan, and Mrs. John Dolan, both of this city, also survive him. Mr. Hanlon, who was a surveyor by profession, was well known in Fairville and Milford where he had spent the greater part of his life.

Charles H. Ebbett died at his home in Lower Gagetown last Thursday. He was in his seventy-ninth year, and leaves a sister and three sons. The funeral was held last Saturday, and was conducted by Rev. D. Patterson, assisted by Rev. C. B. Lewis.

Mrs. William T. Fraser died on February 17, at her home in Lower Portland. She was ninety years of age and leaves two sons, one daughter, twenty-nine grandchildren and thirty great-grandchildren.

NEPHEW OF KING IS AT WORK ON A FARM IN ENGLAND

London, Feb. 25.—Prince Erik of Denmark, a nephew of King Christian X., after working unobtrusively on an English farm at Fairford, Gloucestershire for some months will soon go to Holland and Belgium to continue his agricultural education.

It is said the stay of the prince in England is due to the advice of Minister of Agriculture Pedersen, who encouraged his own daughter to study a domestic life as a maid servant here. It is well known that Denmark is fast becoming a dairy farming, but Mr. Pedersen, while visiting England some time ago, was impressed with the profitable English method of using waste lands in hog rearing, which he is alleged to have described as the best he has ever seen. Accordingly he has purchased a denmar, father of Prince Erik, to send the latter there.

The prince lives in a farmer's family on an equal status with its members. He works hard and for long hours. Occasionally he pays a visit to his aunt, Queen Mother Alexandra, at Sandringham.

A case of wine was the wedding gift offered to Magistrate Pennock of Philadelphia, when he married John Canaday to Miss Sarah Armstrong. The magistrate did not care to accept the wine, and it was given to Constables J. Brady and Edward S. Carver, who witnessed the marriage.

To Put on Flesh And Increase Weight

A Physician's Advice
Most thin people eat from four to six pounds of good solid fat-making food every day and still do not increase in weight one ounce, while on the other hand many of the plump, chunky folk eat very lightly and keep gaining all the time. It's all a matter of what is the nature of the individual. It isn't Nature's way at all.

Thin folks stay thin because their powers of assimilation are defective. They just absorb enough of the food they eat to maintain life and a semblance of health and strength. Stuffing won't help them. A dozen meals a day won't make them gain a single "stay there" pound. All the fat-producing elements of their food just stay in the intestines until they pass from the body in waste. What such people need is something that will prepare these fatty food elements so that their blood can absorb them and deposit them all about the body—something, too, that will multiply their red blood corpuscles and increase their blood's carrying power.

For such a condition I always recommend eating a Sargol tablet with every meal. Sargol is not, as some believe, a patented drug, but it is a scientific combination of six of the most effective and powerful flesh-building elements known to chemistry. It is absolutely harmless yet wonderfully effective and a single tablet eaten with each meal often has the effect of increasing the weight of a thin man or woman from three to five pounds a week. Sargol is sold by good druggists everywhere on a positive guarantee of weight increase or money back.

Raw March Winds

Best Liniment of All Destroys Every Pain But Never Burns

"How thankful we are to get hold of such a wonderful household remedy as Nerviline," writes Mrs. E. P. Lamontagne from her home near Wetaskawin, Alberta. "In this far-away section, far away from a doctor or druggist, every family needs a good supply of liniment. Nerviline is the best of all. It destroys every pain, but never burns. We use Nerviline in a score of ways. If it's rheumatism, aching back, pain in the side, sciatica or stiff neck—you can laugh at them if you have lots of Nerviline handy. I don't think anything could act more quickly. For a general all-around pain remedy, I can think of nothing more valuable and speedy to cure than Nerviline."

The above letter is convincing—it tells how reliable and trusty this old-time remedy is. Nerviline for forty years has been a household word in Canada. Scarcely a home in Canada you can find without Nerviline. Every community has its living examples of the wonderful curative properties of Nerviline which will cure pains and aches anywhere in the joints or muscles. It's penetrating, soothing, warming and safe for young and old to use. Get the large 50c family size bottle; it's the most economical. Small size 25c. at any dealer's anywhere.

Captain Will Tepley of Ram Island Lodge Light, just outside Portland Harbor, has noticed clever seagulls which watch the diving loons, and just before they are ready to rise drop onto them and snatch away their fish, often so quickly that the loon does not know he has lost it. The seagull flies to the land to eat its prize, while the loon loudly laments its loss and then dives again.

No other hair tonic or restorative is as effective or satisfactory as

Lay's Hair Rest

It restores natural color to grey or faded hair. Prevents dandruff, stops falling hair. A healthy beautiful growth follows its use.

Use, day or night, as directed. Shown sold in bottles of 50c. and 25c. Lay's Hair Rest, Toronto, Ont.

B.G. EATERS GET KIDNEY TROUBLE

Take Salts at First Sign of Bladder Irritation or Backache

The American men and women must guard constantly against kidney trouble because we eat too much meat and our food is rich. Our blood is filled with uric acid which the kidneys strive to filter out. If they weaken from overwork, become sluggish, the eliminative tissues clog and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment or you are obliged to seek relief two or three times during the night; if you suffer with sick headache or dizziness, nervous spells, acid stomach, or you have rheumatism when the weather is bad, get from your druggist a bottle of Jad Salts.

Take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia. It has been used for generations to flush and stimulate clogged kidneys; to neutralize the acids in the urine so as to render it harmless, thus preventing that painful condition known as uric acid. It also cures bladder disorders.

Jad Salts is inexpensive; cannot injure; it is a delicate and refreshing lithia water beverage and belongs in every home, because nobody can make a mistake by having a good flushing any time.

TWO ARE ACQUITTED

In the County Court yesterday afternoon, the jury acquitted George Campbell on a charge of theft from the C. P. R., and William P. McFarlane on a charge of setting fire to the court house, market building, Dufferin hotel and one or two other places last April.

The latter case was tried before the following jury: G. D. Davidson, Frank T. Lewis, W. J. Thomas, W. B. McDonough, James A. Brown, James A. Stevenson, Thomas Cogger, William B. Hatfield, Wilfred C. Day, Percy B. Holman, James Higgins and J. C. Lake.

Evidence regarding the fire was given by F. C. Gates, J. C. Berry, Deputy Chief Jenkins, Armstrong B. Clifford, Fred W. McNeil and Wilfred E. McGuire and the Chief of Police told of making the arrest.

Dr. J. V. Anglin, medical superintendent of the Provincial Hospital, was called for the defence, and said that the defendant was suffering from hallucinations, and had imaginary ideas about a certain sect he called "Mormons." These McFarlane described to him, he said, as a band of people who were working to get his money. They held offices at King Square, McFarlane said, and he believed that they employed all the civic officials including the magistrate, the chief of police and the recorder, and that they received half of their salaries for "placing" them.

The jury acquitted the prisoner but found him of unsound mind and he was allowed to go with his parents. The judge's charge in the case of the King vs. George Campbell, charged with stealing a bottle of whisky from the C. P. R. was given yesterday afternoon and the prisoner was acquitted.

INSPECTION FOR MAINE POTATOES

Governor and Council Passes Orders Regulating Shipments Out of State

(Bangor Commercial)

Augusta, Feb. 25.—The governor and council passed the following orders on Monday relative to the appearance of the powdery scab potato disease in Arctostock county near the New Brunswick border.

That the commissioner of agriculture is hereby requested and directed to use the power and authority of the state to:

(a) inspect and regulate the shipments of potatoes in and out of the state and particularly to establish at once a system of complete inspection of all potatoes in and to be shipped from the area infected by powdery scab.

(b) To prevent the replanting of land infected with powdery scab with potatoes the coming season; to use every effort to prevent the planting of seed potatoes other than those known to be free from infection and to use every effort to make clean the infected areas.

(c) In order to completely and successfully carry out the above instructions, the commissioner of agriculture is authorized to invite the cooperation of all railroads and other transportation companies of Maine and Canada and the dealers of potatoes and all other persons engaged in raising potatoes and all other persons who in any way should be able to assist in preventing the spread of this disease.

(d) Also authorize and request the attendance of the commissioner of agriculture, the director of the experiment station, and William A. Marton at the hearing to be held before the horticultural board in Washington, Feb. 28.

Misses Helen and Margaret McMillan of Greenburg, Pa., have neither of them missed attendance at Sunday school for ten years. In the same family Mr. and Mrs. McMillan and their son Fred have records unbroken except for a few days each lost through sickness.

NERVES ARE SORE AND PAINFUL

Neuritis, or inflammation of the nerves, is the most painful of nervous ailments. You may feel the soreness of tenderness throughout the body, or it may be confined to certain nerves. In the head it is called neuralgia; in the hips and legs, sciatica; in the face, tic-douloireux, and in the chest, intercostal neuralgia.

The application of dry heat affords relief from the lance-like pains, but the essential thing is to build up the exhausted nervous system by the persistent use of such a restorative as Dr. Chase's Nerve Food. You will have other symptoms to warn you of the depleted condition of the nervous system, and this is your opportunity to restore to the body the energy and vigor of health.

While this great food cure is stilling new vitality into the starved nerve cells it is also forming new, firm flesh and tissue, and by noting your increase in weight, you can prove beyond doubt the benefit being obtained by its use. This is Nature's way of curing diseases of the nerves, and it is the only way to obtain lasting benefit.

SOUTH SHORE SERVICE

That the special committee of the board of trade handling the matter of subsidies for the south shore steamer service favors the proposition of the Hugh L. Cunn Company for increased subsidy and will report to that effect to the council when it meets tomorrow was the result of a conference yesterday of the committee with R. L. Hendry, representing the owners of the steamer Amelia and Mr. Hopkins for the Hugh L. Cunn Company, and about twenty local merchants. After some discussion, the committee, of which Percy W. Thompson is chairman, came to the conclusion that the proposal of the Cunn company which is now operating will be more satisfactory. The matter will be discussed in detail on Friday.

Don't Suffer With Corns

Try This Remedy

You can't be disappointed with Putnam's Corn Extractor. It is not only the best remedy for corns, but the oldest Corn Doctor, but as thousands know, it is the best. Putnam's Extractor is not a greasy salve that runs all over the foot and inflames it—no, no, no, it is made to go right at corns—to root them out for all time to come. You can remove your corn quickly with a 25c. bottle, sold and recommended by druggists.

WHAT DYSPEPTICS SHOULD EAT

A PHYSICIAN'S ADVICE

"Indigestion and practically all forms of stomach trouble are, nine times out of ten, due to acidity; therefore stomach sufferers should, whenever possible, avoid eating food that is acid in its nature, or which by chemical action in the stomach develops acidity. Unfortunately, such a rule eliminates most foods which are pleasant to the taste as well as those which are rich in blood, flesh and nerve building properties. This is the reason why dyspeptics and stomach sufferers are usually so thin, emaciated and lacking in that vital energy which can only come from a well fed body. For the benefit of those sufferers who have been obliged to exclude from their diet all starchy, sweet or fatty food, and are trying to keep up a miserable existence on gluten products, I would suggest that you should try a meal of any food or foods which you may like, in moderate amount, taking immediately afterwards a teaspoonful of bisulphated magnesia in a little hot or cold water. This will neutralize any acid which may be present, or which may be formed, and instead of the usual feeling of uneasiness and fullness, you will find that your food agrees with you perfectly. Bisulphated magnesia is doubtless the best food corrective and antacid known. It has no direct action on the stomach; but by neutralizing the acidity of the food contents, and thus removing the source of the acid irritation which inflames the delicate stomach lining, it does more than could possibly be done by any drug or medicine. As a physician, I believe in the use of medicine whenever necessary, but I must admit that I cannot see the sense of dosing an inflamed and irritated stomach with drugs instead of getting rid of the acid—the cause of all the trouble. Get a little bisulphated magnesia from your druggist, eat what you want at your next meal, take some of the bisulphated magnesia as directed above, and see if I'm not right."
