### INCUBATOR FOR CHILDREN.

Doctors Want It Introduced in Montreal Maternity Hospital.

In considering how to decrease the very large mortality rate of infants in Montreal, especially of those prematurely and weakly born, physicians have been endeavoring to have an incubator system introduced into the Grey Nunnery, where hundreds of children are received yearly, the Maternity Hospital, and gradually into other such institutions. The incubator is on exhibition at the Pan-American, and it is claimed will save eighty-five per cent. of the children treated. It has been installed with much success in the Maternity hospitals of Paris, Berlin, and London. One of the doctors interested in having the incubator introduced into the city, when interviewed gave the following description of it:

"The incubator consists of a glass case in a metal frame. It is a small, woven wire cot, carefully padded. Fresh air is admitted by a large pipe, first passing through an antiseptic fluid, which destroys any germs that may be lurking in it. It also passes through cotton, which filters out any physical impurities. The air is then warmed, and is finally introduced into

the chamber in which the baby lies. A pan of warm water keeps the atmosphere humid, and the amount of moisture is regulated by a small hydrometer at one side of the incubator.

"The air in entering strikes against a shield below the cot and is deflected downward until it melts the warm current of air heated by a burner placed outside the case. The temperature is automatically regulated by a thermometer. At the side of each case is a small boiler which holds about two gallons of water. Through the proper introduction of cold water the circulation is controlled in the pipes that heat the incubator in the same manner as is done in the house heated by hot water. A thermometer in front of each incubator gives the actual temperature all the time. The infant is swathed, German fashion, and can be seen clearly through the glass doors and sides of the incubator. The infant is removed every two hours in order to be fed. While in the incubators the babies generally lie with their eyes closed, and practically the only sign of life is the occasional flutter of the tiny hands."

Bicyclists and athletes depend on BENTLEY'S Liniment to keep their joints limber and muscles in trim.

## GILMOUR'S CLOTHING!

Our new store is rapidly approaching completion, and we will—early in September—be catering for the better clothing trade of this city. In the meantime, we are not in the least prevented from filling our orders for Custom Tailoring, in which department we are very busy. Your Order for the latter we will gladly receive now.

#### BASE BALL.

Alerts, 8; Roses, 2.

For seven innings the Roses were unable to locate Webster for a single safe hit, while Coakley was hit freely. It seemed possible that the Alerts might shut out their opponents, but in the ninth the Roses got four hits in succession, one a two-bagger by Cunningham, and with a low throw brought in three runs. The game was very slow for eight innings and the crowd commenced to root and kept it up until the end. Miss was given an ovation for a catch of "Pete's" long fly, saving a run. Cunningham and the Alerts did good work in the outfield, and the entire Alert outfield were in their good behavior.

Clippers v. Franklins.  
The final game of the series, for a 250 purse, between these two teams will be played on the Athletic grounds on Tuesday. Each team has won one game, and needless to say, a hard bid will be made for the final. The game will be commenced at 3 p. m. sharp.

Roses Get a Second Baseman.  
The Roses have secured a new second baseman in the person of W. Ring of Boston, who comes highly recommended as a fast and heady player, and with whose aid they expect to show better form in the next game.

The Westfield Beach ball team defeated the Trinity Church base ball team by the score of 15 to 12, Saturday afternoon. Seers and Inceles and Gilmour and Inceles were the batteries.

Halifax Dispatch.  
The Resolutions and Standards have been adopted. The expense of keeping the team together was far in excess of the receipts. There is some talk of the imported men forming a team to tour New Brunswick and Maine.
