TAMWORTHS

Young sows bred for September farrow, and some nice young boars. Write **JOHN W. TODD, R. R. No. 1, Corinth, Ont.**

Estimate of Canada's Crops

In a bulletin issued the middle of September, the Census and Statistics Office publishes the first preliminary estimate of the yield of the principal grain crops of Canada in 1916 (wheat, rye, barley, oats and flaxseed.) as well as a report on the condition of all field crops at the end of August.

Correspondents report that grain crops in Manitoba and Saskatchewan, which were highly promising at the end of July were so seriously affected by rust and hot winds during August, that large areas sown will either fail to produce any crop at all, or have been cut green, whilst the yield of grain from producing areas will be very low both in quality and grade. Whilst the whole of Manitoba and Saskatchewan is badly affected by rust, the conditions are distinctly worse in the southern than they are in the northern parts of these provinces. In Alberta, rust though present to a certain extent, has not proved destructive, and the grain crops continued promising. Frosts, however, of August 11 and again late in the month did considerable damage. In Ontario and Quebec grain yields have been greatly reduced by drought in August; but in the Maritime provinces and in British Columbia the condition of the grain crops continued to be quite favorable.

It is estimated from the reports of correspondents that of the areas sown about 13.7 per cent. of spring wheat, 8 per cent. of oats, 5 per cent. of barley, and 1.8 per cent. of flax will fail to produce any crop of grain. Of the areas sown, however, 3 per cent. of wheat, 5 per cent. of oats and a small area of barley were cut for green feed or turned into hay. These percentages represent deductions from the areas sown of 1,432,300 acres of spring wheat, 849,000 acres of oats and 69,100 acres of barley. It is consequently estimated that the total yield of wheat this year will be 168,811,000 bushels from a harvested area of 10,085,300 acres, as compared with 376,303,600 bushels from 12,986,400 acres last year, and 161,280,000 bushels from 10,293,900 acres in 1914. The average yield per acre is 16¾ bushels as compared with 29 bushels last year and 15.67 bushels in 1914. The estimate for oats is a total yield of 341,602,000 bushels from 9,795,000 acres, as against 520,103,000 bushels from 11,365,000 acres in 1915, and 313,078,000 bushels from 10,061,500 acres in 1914, the average per acre being 34.88 bushels in 1916, 45.76 bushels in 1915 and 31.12 bushels in 1914. For rye, the estimate is 1,990,800 bushels from 101,420 acres, as compared with 2,394,100 bushels from 112,300 acres in 1915 and 2,016,800 bushels from 111,280 acres in 1914, the yields per acre being 19.63 bushels in 1916, 21.32 bushels in 1915 and 18.12 bushels in 1914. Barley yields 34,408,000 bushels from 1,326,800 acres, as against 53,331,300 bushels from 1,509,350 acres in 1915 and 36,201,000 bushels from 1,495,600 acres in 1914, the yield per acre being 25.89, 35.33 and 24.21 bushels respectively. The flaxseed estimate is for 8,625,300 bushels from 710,000 acres, an average of 12.15 bushels per acre. For the three Northwest provinces the total estimated yields are, for wheat 145,466,000 bushels, for oats 243,114,000 bushels, for barley 24,502,000 bushels, for rye 601,000 bushels and for flax 8,572,000 bushels. The average yields per acre of wheat are: In Manitoba 10½, Saskatchewan 16, and Alberta 24¼ bushels per acre.

At the end of August, the condition of field crops, expressed in percentage of a standard representing a full crop, was as follows: Spring wheat 69, oats 74, barley 73, rye 80, peas 68, corn for husking 67, potatoes 72, alfalfa 94, corn for fodder 77, pasture 86, hay and clover 103. All other crops ranged between 75 and 78. In Manitoba the condition of spring wheat was marked down to 37 per cent. as against 85 per cent. and in Saskatchewan to 61 per cent. as against 94 per cent. at the end of July. The percentage of 37 for Manitoba on August 31 is the lowest on record since the present crop reporting system began in 1908.

Make Your Car Work As Well As Play

You might as well get a double service from your car. Hitch a FOX Trailer to it, and you'll find it such a splendid utility that you, too, will catch some of the enthusiasm responsible for the demand in the United States for thousands of trailers in the last few months.

For the farmer, for the delivery man, for anyone with a hauling problem to solve, nothing so useful has been developed for years. The FOX Trailer can be attached to any make of automobile with absolutely no risk of injury to the car. Built in accordance with the best principles of automobile design. All-steel chassis; ball-bearing wheels, interchangeable with Ford wheels; solid Dunlop tires, guaranteed for 10,000 miles. Size of body 6 feet by 4 feet. Price \$85 f.o.b. Windsor. Send for descriptive catalogue.
