Scaife's System consists in using exact time-scales of the years of which any historical period are made up. These time-scales are placed on either side of the chart, and the materials of historical study are carefully built into them—the more important events being printed in larger type. The eminent personages are represented by parallelograms, and the distinct periods of national growth or decay are indicated by alternating strips of color determined in breadth by their duration. Everything being accurately adjusted to the time-scales, the student has only to choose an event, personage or period, and by running the eye across the chart, see not only the contemporary events and personages of sacred history, but the great events and personages of Roman and classical history also.

A VALUABLE AID TO BIBLE STUDENTS.

The New Testament

Translated from the Greek
into current English by

FERRAR FENTON.

Cloth boards, sprinkled edges, - - 90 cents.

Mr. Fenton, who, curiously enough, is a descendant of one of the original translators of the Authorized Version of the New Testament, was engaged for forty years on the work that is now presented to the public. The almost strictly literal translation makes it a most valuable aid to the Bible student.

"Every page is bright with striking renderings, familiar texts being made to yield new meanings and fresh instruction in the free and forcible speech of common life."—*The Christian*.
