The selections in the foregoing lists has been partly subject to availability and as much as possible for the human interest contained. The Committee who have made the selections do not regard the list as full and complete, but it has been limited on account of the lack of published material which they could recommend. On account, however of the great growth of the movement for school decoration, the material is rapidly increasing, and efforts are now being made to fill the need for Canadian subjects. It is therefore the hope of the Committee that a supplementary list will be published at some future date.

With the intention of making the lists of educational value, the arrangement has been made to show at a glance the different periods of architecture, sculpture and painting.
