

REMARKS.

All who design to become Students in this Institution should enter, if at all possible, at the commencement of a Term, as the regular Classes are then organized; pupils, however, will be received at any time.

The only pre-requisites for admission to the Primary Department are a good moral character, ability to read and spell, and age sufficient to enable the Pupil to prepare regularly for recitation.

The time which will be occupied in either Course will depend upon the capacity and industry of the Student.

Classes will be formed at the commencement of each Term, in such studies as may be required in each Course.

Certificates will be given at the close of each Academical Year to such Students as may have passed satisfactory examinations in all the studies of either course.

Persons who may not wish to pursue either course regularly, will be allowed to enter any of the classes in order for which they are qualified.

Whenever it may be requested by a sufficient number of Students, classes will be instructed in French, Book-Keeping, Land Surveying, Navigation, Analytical Geometry, Calculus, &c. &c.

The Institution will be furnished as soon as possible with Maps, Globes, Astronomical and Philosophical Apparatus, &c. &c.

Lectures will be delivered upon the different branches of Natural Science, &c.

Every effort will be made to secure cheerful diligence in application to study. The object will be not only to instruct, but to educate; not only to impart useful knowledge, but to fix good habits. No reasonable exertions will be spared in
