Note.—The Canada Permanent was re-organized in 1899 by amalgamations as stated in editorial.

the Government, and duly sworn to by the officers of the companies, clearly indicate that the Canadian business as a whole has been anything but profitable. True, the great fire at Saint John, N.B., in 1877, cost the companies somewhere about six and a half millions, and the Ottawa-Hull conflagration of last year, three and a half millions more, making altogether ten million dollars; but conflagrations of more or less magnitude are liable to occur at any time,—the several conflagrations which have occurred in Montreal since the first of the year will alone result in a loss to the companies nearly as great as was caused by the Ottawa-Hull conflagration of a year ago. It is obvious that the rate of premium paid in the past has not been sufficiently high to cover the conflagration hazard.

The Superintendent of Insurance in his report for 1899 very aptly refers to the Ottawa-Hull conflagration in these words:—"In prosperous times it is well to prepare for the day of adversity. Conflagrations such as that above referred to must be looked for... The possibility, indeed the probability, of such disasters constitute a liability on the part of the Fire Insurance Companies, for which provision should be made by the creation of special funds, varying according to the nature of the business transacted, to the many conditions and circumstances to which the business of each company is subject, but which it would be impossible to enumerate. Such liability cannot be accurately estimated, but it should always be regarded as a substantial amount, and the fund exacted to meet it should be looked upon as an actual liability and not treated as a surplus."

To create such a fund as the Superintendent of Insurance speaks of, it is obvious, judging from past experience, that the companies must charge higher premiums to enable them to do so.

### THE ONTARIO LOAN AND SAVINGS COMPANY.

We present in this issue tables of the liabilities and assets of nearly all the loan and savings companies whose head offices are in the Province of Ontario. These tables have been specially compiled for "THE CHRONICLE" from the annual statements of the companies, of which they have very courteously supplied us with copies for this purpose. The schedules will be in advance of the official reports, severally of the Dominion Government and the Ontario Government, by several months. The tables include the more important items in the annual statements, both of liabilities and assets, from which their financial position and the extent of their business may be judged. There have been so many changes in the last two years in these organizations that any comparisons between their position in any preceding year was not feasible. The most important change was the amalgamation of the Canada Permanent, the Western Canada, the Freehold, and the London & Ontario, who were incorporated under the title, Canada Permanent and Western Canada Mortgage Corporation. Other changes were
