Farmers
say about the
Waterloo Boy
Tractor---**

**WOULD NOT CARE TO FARM
WITHOUT THE WATERLOO
BOY TRACTOR**

Richmond, Sask. July 14th, 1917.
The 12-24 Waterloo Tractor that I purchased from you has given the best of satisfaction. We have used it for disking and plowing with the best of results. We are using four plows and although this land is very heavy it does not slacken the speed at all.

We are using two outfits of horses plowing, but find the tractor does the best work.

We would not care to farm without the Waterloo Tractor.

The service we have received from you has been of the best. No one can do wrong by purchasing the Waterloo Boy Tractor.

(Sgd.) GEORGE A. MONTGOMERY.

Brora, Sask., July, 1917

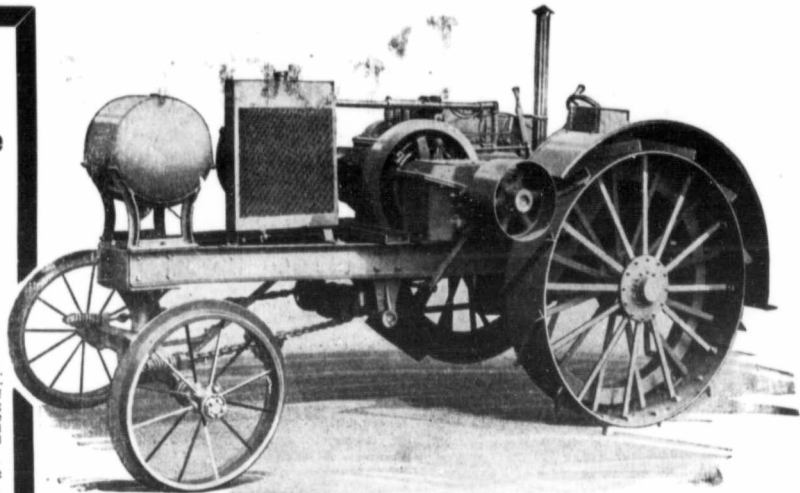

I wish to let you know that the Waterloo Boy Engine which I purchased from you a few months ago gives good satisfaction. We have run a thirty-two disc harrow over 200 acres at a cost of 15c. per acre, plowed about 30 acres, hauled four 10-inch disc plows at a depth of eight inches, at a cost of 50c. per acre. We could not do this work nearly so cheap with horse power. We have had no trouble nor loss of time, and on the Waterloo Boy Engine is our boy's first experience. I would say that in buying machinery for 33 years I never made a better investment. If I were buying again it would be the Waterloo Boy.

(Sgd.) THOMAS BREDIN.

Davidson, Sask., Oct. 29, 1917

In reply to your letter of some time ago, asking for our opinion of the Waterloo Boy Tractor, I got say that we have plowed 425 acres and threshed twenty-five days this Fall. We found the engine to be all you recommended it to be, and we consider it to be as easy on fuel as any tractor on the market. In threshing we pulled a 28-inch separator and threshed around seven to eight hundred bushels of wheat a day. In plowing we plowed from 8 to 12 acres a day in stubble and 6 to 7 acres a day in breaking. We consider the engine is underrated in power of capacity. I will send photo of my outfit in operation threshing, in a few days.

(Sgd.) STANLEY BANKS.

Buy a three-plow tractor because it is the Ideal size for Field and Belt Work—It does twice the work of a two-plow tractor at the same cost and in the same time—Buy a—

WATERLOO BOY

ONE MAN KEROSENE TRACTOR

The Greatest Power Plant of Them All---

The Waterloo Boy 12-24 Three Plow Tractor is the logical size for Western Canada farms, it is the proper weight, it has the power to do all belt work including operating a 24 separator with all attachments. It has reserve power to pull three plows anywhere. There is value built into the Waterloo Boy Tractor that will give you years of service at both belt and draw bar.

First cost is not the only cost of a tractor, you need to buy a tractor that will stand up under the strain of heavy work day after day—You want a proven tractor, not an experiment.

When you buy a tractor get the best, it is cheapest in the long run. A cheap tractor is an expensive investment, a good tractor is a money-saver and a money-maker—get a Waterloo Boy One-man Kerosene Tractor.

The Waterloo Boy Tractor is built to operate on KEROSENE—the cheapest fuel. Hundreds of farmers in Western Canada testify to its successful operation on kerosene, let us send you names and addresses.
