IHC CREAM HARVESTERS SOLVE THE LABOR PROBLEM

DO YOU own any cows? If you do, you own them for the profit there is in them for you. You keep two—five—or a dozen cows, and your object is to make money.

Then, with the present price of butter and milk, why not make all the money you can?

Why not do it with as little labor as possible?

Did you ever figure out that you could keep double the number of cows that you now keep with practically no increase in labor—that you could more than double your profits, and that you could make more money out of each individual cow if you went at it in the right way—that is

The IHC Cream Harvester Way

With one of these machines you skim milk at milking-time and have done with the whole operation. Cream ready for market—sweet, appetizing milk ready for the calves or pigs while it is still warm. Only one can of cream instead of a dozen cans of milk to haul to the creamery. You do not have a great number of pans and crocks to wash twice a day, because you get all the cream; you cannot get it all by hand-skimming. There is not even a trace of cream left in the milk when separated with an IHC Cream Harvester.

IHC Cream Harvesters are of two styles—chain drive and gear drive—each made in four sizes. It will pay you to look into the matter and see what extra profits one of these machines will bring you. Call on the International agent of your town and get a catalogue. Or, if you prefer, write the International Harvester Company of America at nearest branch house for further information.
