10 Richmond Sq. - MONTREAL

MUNICIPAL IMPROVEMENTS.

The city of Regina, N. W. T., is not only looming up largely these days, being now the capital of the new great province of Saskatchewan, but is actively pushing municipal improvements.

The water works system, which furnishes a plentiful supply of pure soft spring water, is now completed and in use, for domestic service only. Construction began in June last, and although the system is a large and extensive one, bringing water by natural gravitation a distance of fully seven miles from the city, it was vigorously pushed and completed ready for use on New Year's day. Several domestic services have already been installed and in use, and in the coming year very rapid additions will be made.

A fine power house has been built about 75 feet square, containing two Babcock & Wilcox water tube steam boilers, each 250 horse power, also a 450 h.p. high duty Corliss engine coupled direct to an alternating Westinghouse generator, 300 k. w. at 150 r.p.m., for supplying light and power.

The entire sewerage, waterworks and electric light systems have been designed and are being carried out under the supervision of Mr. John Galt, C. E., Toronto.

M. BEATTY & SONS

WELLAND, ONT.

**Dredges, Ditchers, Derricks and
Steam Shovels**
of various styles and sizes to
suit any work.

Submarine Rock Drilling Machinery
Hoisting Engines, Suspension Cableways,
Horse-Power Hoisters, Gang Stone Saws
Centrifugal Pumps for Water, Sand and
Gold Mining, and other Contractors' Plant.
