

Less Than Two Weeks to Erect a Fine New Barn

Instead of calling in half the countryside for a "raising bee" and boarding a big gang of builders for weeks to get the job done—buy a Preston Barn and have it erected the quick and easy way. We send out a gang of half-a-dozen men, and the building is so fabricated before leaving our Factory that this small group of workmen can put it up in less than a fortnight. When a new barn is needed in a hurry, there is nothing like the Preston System—whereby the erection of a fine new barn is the matter of "days" instead of "weeks."

Preston Steel Truss Barns—with the Preston system of lightning protection—are safe from the worst electric storm. They are more-over fire proof—cannot be set fire from without, from any cause whatever.

Preston Steel Truss Barns are built to hold all the crops of any Canadian Farm of whatever size.

Write us, stating the size of your farm, and get the benefit of our experience in designing all types of buildings for all kinds of farms.

*Please send me your
Big Barn Book*

NAME

R.R. No.

Rural Landscape Architecture

Let us show you how to lay out your entire Farm—furnishing plans that indicate the most efficient layout of fields, lanes, fences, gates, windbreaks, orchard and shrubbery. This service is designed to aid you in handling crops and stock economically, and includes approved directions for "crop rotations" on the whole farm.

Send for our big Barn Book giving detailed information about the Preston Service to Farmers and showing the complete line.
