HOUSING AND THE PUBLIC HEALTH

Synopsis of An Address of Hon. John Harvey, President of the A.P.C., Made to the City Council Last Evening.

me to overwhelm the Council with | cught to be empowered to arrest be criticisms or suggestions, but to speak | ple breaking this law. about the housing question, which had already occupied considerable of their attention, and with the need of which of the city, and submitted the followthey were quite familiar. He stated ing table:that he was quite aware from personal conversations that both the present Mayor and the last Mayor as well as individual members of the Council were alive to the necessity of trying to improve these conditions. His onject was to emphasise the facts which they already knew.

Before going into that matter, how ever he suggested that it might be of value to the Council in its difficulties to obtain the services of a Municipal Auditor or Expert from abroad for a few weeks, which would probably not he very expensive, and that such a person should be invited to come down and investigate the Council's resources and system. He stated that the Secretary would probably be glad of the advice of such a person, and that it was obvious that the Council themselve's had not time to make such an investigation thoroughly, but he thought that a person versed in these subjects and coming here with a fresh mind would be of considerable help 1,000 living. to them in solving the various prob-

lems which confronted them. Mr. Harvey went on to say that the ommission of Public Health, now siting, had had a number of discussions regarding the situation in St. John's, and the following points might possibly be some time brought officially before the Council by that body:-

(1). The supply of Milk, on which the infantile mortality is so largely dependent:

(2). The Meat supply, which is notoriously bad. He stated that he was aware that the Council had already considered the ossibility of insisting that all meat aported for food in St. John's should he slaughtered in a Municipal abateir. This would enable proper in spection to be made of the animals which are now sent down from the

which are now sent down from the checking provinces.

He also stated that there certainly ought to be an Anti-Spitting Law which would make it possible to prevent the sidewalks in St. John's from the sidewalk in St. John's from the same time there should be a system atic inspection, as provided under Sc. Neve Food—not from imitations or substitutes. So cents a box, all dealers or substitutes or substitutes. So cents a box, all dealers or substitutes or substitutes. So cents a box, all dealers or substitutes or substitutes. So cents a box, all dealers or substitutes or substitutes. So cen

He then took up the question of th housing problem and the death rates

Boy Had Fits For 6 Years Druggist advised DR. A.W. CHASE'S NERVE FOOD—Cure complete

could not talk.

"The family physician said all he could do was to keep them down somewhat. The second physician pronounced trouble Jeffersonian epilepsy, but could not cure him. He suffered for six years as out, and that the children were kept as out, and the thildren were kept as out, and the the children were kept as out, and not cire him. He suffered for six years and before beginning the use of Dr. A. W. Chase's Nerve Food had three fits is about five days. Our druggist recommended Dr. A. W. Chase's Nerve Food. He has taken seven boxes and has not had the symptom of a fit since. His called the symptom of a fit since. His section 13 entirely covers the necessity improved: he is not had the symptom of a fit since. His section 13 entirely covers the necessity. Handle, we will take the symptom of a fit since. His section 13 entirely covers the necessity.

though St. John's possesses more wealth and more intelligence than the rest of the Island its death rate i enormously worse, and that while th est of the Island shows a marked ovement in the death rate from Tuberculosis, St. John's has remained stationary. The improvement i the Colony had begun from 1906, when Anti-Tubercular campaign had started. He was in hopes that the figures of 1910 would show that St. John's had also begun to decline, Lecause the poorer districts had been well canvassed for the past eighteen months by nurses going from house to house, and that these nurses had really done splendid work and that Hon. John Harvey, being introduced and on women's skirts and carried in anybody going through the town Sunday. would see to-day at least twice as doubtedly improved in other ways. Mr. Harvey went on to say that there could be very little hope for improvement in St. John's while the houses were getting worse and the children were being brought up under conditions which precluded their havduced a map of St. John's showing that nine-tenths of the consumption in The Colony,—1906. Total Deaths, the town was confined to a certain 2.30 p.m.

Brookfield School Chapel—EvenBrookfield School Chapel—EvenBrookfield School Chapel—EvenChapel School Chapel—EvenChapel School Chapel School his area was also the area of the corer houses, and he said that these

ouses were all getting constantly In his opinion there ought to be a empulsory Education Act, at least as egards St. John's. Children now go o school pretty much when they like, and many of the parents refuse to send them to school because they do not consider their clothes are good enough to go to school in. He stated that if there was a Compulsory Education Act it was probable that the parents of these children would exert hemselves to see that they were roperly clothed, for their was no eason why any able-bodied man in St. John's should not be able to clothe his children decently and live in comort if he was moderately industrious.

What he came particularly to suggest to the Council was that they Mrs. J. D. Palmer, 38 Park St., Amsterdam, N. Y., writes: "When six years of age my boy began to have fits."
They came on in the night. He would make strange noises, stiffen out, froth the council should begin in a small way and taken. should put in force Sections 12 and 13 at mouth, face would twitch and some-times turned purple. After the fit he could not talk.

ould be possible at any rate to know andlords could be called upon to imapossibility of immediately turn cent, to a Building Society to very large amount of money in the Savings Bank at 3 per cent, he thought that there ought to be an unlimited per cent, guarantee. A system could be begun experi

entally on a small scale so that litle or no risk would be involved. He cial improvement by drafting a few nt tenements into more decent ones Council for forming an opinion s to the feastibility of such a scheme

He again stated that what he was ally desirous of asking the Council as that inspection in the two direcons which he had referred to should undertaken by them. He thanked ne Council for their patient hearing nd after a short address by the May in which he stated that the Counil was very much in sympathy with what the speaker had said, and tha large number of the points raise nad already been discussed by then and were slated for action as soc as they could manage it, and that the Health Department had already b equested to make as report upon th number of unhabitable houses Harvey withdrew

Sunday Services.
