

Indigestion Cured

This disease from which so many suffer gives the average physician a great deal of trouble. The best medical men have endorsed PSYCHINE, and recommended it in scores of the most obstinate cases. It has never failed in a single instance to give prompt relief. When directions have been followed, a few doses will remove that tightness and weight on the stomach. Taken regularly it positively cures General Distress, Flatulency, Nervousness, Coated Tongue, Heart Burn and Palpitation. If you have never used PSYCHINE, don't hesitate a moment longer. Try PSYCHINE to-day.

PROOF

Mr. Arthur Tansley, 28 London Street, Toronto, says: "For six or seven years I was troubled with indigestion and dyspepsia. Too much acidity of the stomach the doctors said, originated the troubles. I tried scores of remedies without avail. Eventually I used PSYCHINE and this brought immediate relief and cure."

NO HOME SHOULD BE WITHOUT PSYCHINE

It prevents the children taking cold, wards off that terrible malady, La Grippe, and completely fortifies them against disease. It should always be used for colds, weakness, loss of appetite, bronchitis and weak lungs.

For sale by all druggists and dealers, 50 cents and \$1.00.

BOTTLE OF WHISKEY IN

HEART OF MAPLE TREE
Lumber Cutting Down Tree in Park
Makes Remarkable Discovery

Council Bluffs, Iowa, May 25.—A pint bottle filled with whiskey, its age of which is uncertain, has been found here embedded solidly in the heart of a maple tree almost four feet in diameter.

President Graham of the Park Board concluded that there were too many trees in Bayville Park, a breathing spot in the center of the city, so he decided to cut out a number of the maples that were planted more than fifty years ago, when Council Bluffs was first given a place upon the Iowa map.

The particular tree that was in the course of a new path that was proposed was marked for the sacrifice. The choppers felled this tree, finding the bottle from three feet to the trunk. The bottle was found in a four-foot length, eight feet from the butt the saw had missed a long necked black bottle.

Observing it, the choppers carefully hewed away the wood, when to their surprise they found a bottle of whiskey, which was a bottle of one pint capacity, filled with liquor. The cork was removed and the odor of liquor became apparent. It was a sample of whiskey, who pronounced it whiskey of a most superior quality.

How the bottle of whiskey got into the center of the huge maple tree is a mystery that even the oldest settlers find it difficult to solve. At its place about it was there any cavity and through the rings of the wood from the place where the bottle was lodged, each one of which represents a year's growth, it must have been there thirty years. Besides this, old settlers stated that the bottle is of the type in use from fifty to sixty years ago. The bottle and contents have been placed in the public library as a curiosity.

HOW A CRIMINAL

MAY BETRAY HIMSELF
Prof. Munsterberg Makes Interesting Experiments in Thought Reading

Cambridge, Mass., May 25.—Professor Hugo Munsterberg has given a remarkable demonstration of his psychological method of detecting crime before the class of philosophy in Radcliffe college, the feminine annex to Harvard. Taking three girls to the laboratory as subjects, the professor proved that no matter how they attempted to evade him he could read their minds, penetrate their actions as manifestations of what was in their minds. Besides demonstrating his own theory, Professor Munsterberg proved that he has solved the problem of reading a woman's mind, and that in future the thoughts of the wife will be an open book to the husband. The possibilities of the professor's discovery can hardly be estimated.

The three girls who submitted to the test are Helen Thayer, of the class of 1911, Ruby Hobbs, senior, and Miss Beaton, of the class of 1912. The professor told the class that he had several clippings from morning papers on every subject. He said he would have the three girls draw each a clipping in such a way that he would not see which of the three he would find out from them what clippings they had.

The conditions the professor imposed were that when he said a word the girls should speak it aloud. Then he asked each of the three to try to deceive him as to which clipping she had, just as a criminal would try to mislead him in trying to detect what crime he could not see.

The professor asked several words at random at the first girl and she answered back as quickly with any word that came into her head. When a word connected prominently with the clipping was sprung, however, there was a significant pause for the first thought injected into the girl's mind was the clipping and she was unable to think instantly of something with which to mislead Prof. Munsterberg.

One of the clippings drawn by the girls told of former President Roosevelt's reception by the Emperor of Germany.

When Prof. Munsterberg sprung the word "emperor" on the girl which held the clipping she could not answer without a pause. The pause in the first test was a second and in the last two tests about half that time.

This Radcliffe college test was regarded as the most successful demonstration Prof. Munsterberg has so far made of this method of detecting crime. A short time ago, however, he experimented with a man suspected of forging a cheque and his plan worked perfectly. A significant pause followed both the words "bank" and "cheque" when addressed to the suspected man.

NO HOPE OF SAVING ANY

OF THE GOODYEAR DREW
It is Now Certain That Large Number of Men Were Drowned

Sault Ste. Marie, Mich., May 25.—Captain William McElroy of the up-bound steamer William Siemens was within a mile of Monday's fatal collision on Lake Huron, when 11 of his crew were lost from the steamer Frank H. Goodyear and that the Siemens crew witnessed the running of the five survivors by the crew of the steamer Wood. Some hope was entertained yesterday that the Siemens might have picked up additional survivors, but this hope proved to be unfounded.

NEW RULE FOR MISSOURI

Civic Representatives Discuss Commission Government at St. Louis Conference

St. Louis, May 25.—Power to St. Louis, Kansas City and St. Joseph to adopt the commission form of government is proposed in a plan presented to the Civic League of St. Louis, the board of trustees and the City Club Kansas City at a conference of those bodies today at the Hotel Jefferson to discuss the submission of a home rule bill at the November election.

The plan is fostered by L. A. Laughlin of Kansas City, representing the City Club, and is in addition to the question of submitting an initiative bill granting power to the three cities to control their police and excise departments. Laughlin is the author of the Home Rule Bill in the last legislature, and was urged by Governor Bradley as representing his views.

The fresh holders are represented in the conference committee by Chairman Fred Lehmann, Dwight P. Davis and Charles W. Gatz. The City League representatives are P. N. Judson, E. C. Eliot and W. Christy Bryan. L. A. Laughlin, president of the City Club of Kansas City, and others represent that organization.

THE BASIS FOR

PERMANENT GROWTH AND PROSPERITY AT

is the immense natural wealth of this new island empire, Central British Columbia. In the great valleys tributary to Port George there are 50,000,000 acres of superb agricultural land. It produces luxuriant crops without irrigation, and the fruits and vegetables of the temperate zone are readily and successfully grown throughout.

The extent of the mineral wealth that awaits development in this immense region can only be vaguely hinted at. To the north and northwest are the Finlay and Ingendia districts regarded as the richest metalliferous district of the New World, undeveloped as yet because of the lack of transportation.

To the northwest are the excellent and inexhaustible coal deposits in the Valley of the Peace. To the south and east are the gold fields of the Cariboo, which drew thousands of miners and poured forth a golden stream in the days of '48. Placer mining has had its day, but, hand in hand with transportation, comes the permanent quartz-mining industry to develop steadily increasing wealth, where merely the surface had been scratched before.

Copper, gold, silver, lead and coal in quantity beyond reckoning. He tributary to Port George, in all directions, awaiting the magic touch of transportation to provide employment for tens of thousands, and to make the inland empire thrum with industry.

Port George, at the Center of British Columbia, is the center of the province which contains the greatest area and greatest quantity of standing timber in the world. The lumber industry is being developed at Port George, which will find a market for its vast product on the Pacific and beyond.

Development of these great resources is proceeding logically. Settlers are flocking to Port George, the rich lands are being subdued in advance of the railway's advent. Here is a specimen dispatch, taken from the Victoria Colonist, showing the kind of development that is in progress.

MANY BUYERS

FOR NECHACO

Seventeen to Be Taken in From Ashcroft to Take Up Lands in Northern B.C. Valley for Colonization.

Mr. W. A. Leathwaite, managing director of the Nechaco Valley Land Company, a subsidiary concern of the Winnipeg and St. Paul colonization company, which settled 700,000 acres in the prairie country in 1904-5, left for the north to look over the lands which they are expected to purchase for colonization purposes.

The parties will travel from Ashcroft in two special stages secured for the trip. They will include H. W. Gundy, of Des Moines; E. J. Heath, of Minneapolis; Angus McGowan, of St. Thomas, Ontario; N. T. McKinnon, of Winnipeg; Capt. Falk, of Seattle, who is largely interested in the Puget Sound Navigation company, and others.

Let us send you maps, plans and official data. You must act quickly or you will be too late.

TURNING THIEF TO HAVE

HAND READ BY GIPSY
Servant Girl Tells Unusual Story When Confessing Forgery

London, May 25.—Susan Smith, a neatly dressed girl of twenty, whose address was given as Haswell Colliery, Sutherland, told at Kingston, a strange story of the reason that impelled her to forge her master's name in cheques drawn upon the Capital and Counties Bank Ltd.

Arthur Bertram Paine, of Remlaw house, Crossways, Walton-on-Thames, said Smith, who had been a general servant in his house, left his employment on April 12. Three days before that finding his cheque book had been tampered with, he went to the Leatherhead branch of the Capital and Counties Bank to ascertain what his balance was. He then learnt that there was a deficiency of £14 6s. 6d. and asking to see his cheques, he found that two of them, for £3 10s. 6d. and £5 10s., were forgeries.

On examining his cheque book he discovered that the counterfoils of these two cheques had also been torn out.

Going back to Walton-on-Thames, he ascertained that one of the cheques had been cashed by a grocer and the other by a butcher, and that both had been presented by Smith. On April 11 he asked the manager of the bank to come to his house, and he then taxed Smith with the theft.

Breaking into tears she admitted it, and when asked why she had done it, said: "It was the gipsy." Mr. Paine said: "What on earth gipsy was it?" and Smith replied: "A woman who came round to the house and asked me to cross her hand with gold."

Temporarily Staid
Smith said she told the woman she had no gold, and the gipsy then said: "Can't you get some from your master on from the cheque book?" She replied "No," but on thinking it over she went to the bureau in her master's dressing room, and finding his cheque book, she tore out one of the cheques. In his waste paper basket she found a torn piece of paper bearing his signature; she filled up the cheque for £3 10s. 6d. and copied the name, the gipsy, she said, standing by and showing her how to do it. She then went to one of the tradesmen, cashed the cheque, and returning, gave £3 of the money to the gipsy. On a second occasion she said she forged another cheque for £5 10s. She gave the whole of this to the woman.

PAPER FROM CORNSTALKS

Product is Said to Rival in Quality That From Wood Pulp.

Washington, May 25.—Experiments by the federal government in the making of high-grade paper from corn stalks have been completed at the government's experimental plant at Cumberland Mills, near Portland, Me. Samples of paper were brought to Washington and further investigation in the papermaking laboratories of the agricultural department.

The experiments have been so successful as to lead experts to declare that cornstalk paper rivals that made from wood pulp for books, writing purposes and other uses requiring a good grade of paper. At the present time the manufacture of cornstalk paper is too costly to make it available for newspaper use. The government experts declare it can be manufactured to compete profitably with good pulp paper for other uses, and that it is a promise of being more durable than the paper now in use.

A machine invented by George R. Sherwood of Oak Park, Ill., was constructed for the experimental plant near Portland, and the corn experiments will be followed by attempts to make a commercial product from rice straw. Experiments also were made with broomcorn, but were in no sense as successful as those recently completed with cornstalks.

The experiments have resulted in statements by the government experts that cornstalks can be converted into paper on a commercial scale, and that they offer a satisfactory and immediate substitute for pulp wood. The recent action of Canadian provinces in prohibiting the exportation of pulp wood to this country has resulted in close observation of the government's experiments by the financial interests, and the new paper is being submitted to close scrutiny and severe tests.

Visited the Queen Mother

London, May 25.—Mrs. Theodore Roosevelt visited Buckingham Palace today and had a "long chat" with Queen Mother. The queen mother was made at the suggestion of her Majesty, who when she received Mr. Roosevelt yesterday, expressed the hope that she might see the former president's wife.

Land Buyers, Attention!

Below is the description of three very desirable half sections of land, situated at Red Willow, near Stettler, and north of Buffalo Lake. Railroads now very close to same, under construction.

The land is choice black loam (deep), fairly level, all can be plowed. Some small brush. It will sell to any man who knows good land and wants a good deal. Good terms are offered to suit.

East 1-2 35, Township 40, Range 17, W. 4 | West 1-2 33, Township 42, Range 20, W. 4
West 1-2 35, Township 40, Range 17, W. 4 | 3-4 30, Township 19, Range 2, W. 5

For particulars as to price, terms, etc., apply

515 CENTRE ST. E. E. TAYLOR 515 CENTRE ST.

MOUNT ROYAL

One view lot in block 42, for \$1650. Cheap.
One lot facing west, block 42, for \$1500. A snap.
50 x 130, corner, in block K., for \$1850. Good buying.
Two fine view lots in block 41, at \$2000 each.
Very large corner view lot, block 35, for \$2500.

FARMS

1-2 section close to Calgary, half under cultivation, large frame house, large barn, stables, corrals, root houses, etc. It is 6 miles from Calgary, \$50 per acre. This is by far cheaper than anything offered. Easy terms.
640 acres to miles east of Claresholm, one mile from beautiful Clearwater lake, 200 acres broken, 80 acres in crop, fenced, good spring of pure water on place. A snap for few days at \$25.

Real Estate Trust Company, Ltd.

BOX 1129, PHONE 595

A GOOD LAND BUY

One half section three miles northeast of Aldrie, all enclosed with fence, 125 acres in crop, which is rented for 1-2. There can be cut 150 tons of hay, which would give a nice revenue. Soil is best, being black loam with clay subsoil. Price \$25 per acre, with terms \$2500 cash and balance in five annual payments.

Party would consider trade for good residential property in Calgary as part payment, or he would consider a good automobile in deal.

We still have a few Camrose "Dick Division" lots left at \$150 for inside and \$175 for corners.

An eight room furnished house on 8th Avenue west, near Normal school for rent or sale.

An office for rent at 913 1st Street east.
Fine large bright stores for rent with full sized basements.
