The Story of the Dollars

The ideal way of earning money is to make your dollars work for you. Make your dollar work where it will earn the most by seeking for the investment that will pay the best.

The dollar that earns but 2 or 3 per cent. is almost as bad as the idle dollar which earns nothing We advise Taxi
Cab Stock at \$6 per share, par value \$5.00, for beginning January 1910, it can pay a dividend of 10% per annum or 2½% quarterly.

The Idle Dollar

The dollar that is tied up in bad invest-

—the dollar that is invested in (conservative) low interest bearing securities, usually sold at a high premium--the dollar that is not invested anywhere, re-

posing in the old stocking under the mattress, er in the tin teapot on the pantry shelf----the dollar that buys the things that you

would be better without--this is the idle dollar.

The idle dollar gives no man comfort in holding, keeping, owning or wasting.

The Busy Dollar

The dollar that is working for you all the -the dollar that brings you a big percentage

--- the dollar that is invested in good commercial stocks or industrial enterprises and earns away above the ordinary bank interest-

-the dollar that by quick turns and clear foresight doubles, trebles and quadruples itself--this is the busy dollar.

To keep your dollar busy make it work for you and earn big returns. An investment in Taxicab Stock will prove

the best known medium.

The Ideal Investment

An industry that fills a long felt wast, which supplies an insistent and growing demand, which has possibilities of great future expansion, is the ideal investment. Such a one is Toronto's system of Taxicabs, for in barely six menths it has proved its big carning

capacity. What it may do in the future, with an outfit increased many times, you can only surmise. Taxicab Stock has a great future, and the time to buy Taxicab Stock is now. SUBSCRIPTIONS will be accepted up to 100 shares in the order received at this effice.
