London, Ont., Wednesday, June 21.

Our Obligation.

EFERENCE has been made in these columns previously to the fact that every consideration should be given the case of returned men who have not been able to get started, or attain as good positions as they had before they enlisted and went overseas.

A letter comes from a reader in a town near London, calling attention to a case that has come to the atten tion of some of the good people there. A young man who had been overseas for some years came back in fair health, at times indifferent from the exposure and hardship to which he had been subjected. He seemed to improve for a short time, and was married a year or so ago and the young couple started in to keep house. Inside of six months his troubles began to come to the surface. His condition became worse, until finally he was not able to work steadily, and had to give up the position he had. At only odd times was he able to get out and work.

His wife decided to take her share of the load, and for the first time in her life started out to work in order to make ends meet at the house. A note by the husband to an old friend shows the misery of his heart in this new turn: "To think it has come to this, me home here in the house and - going out to work. Oh, how I hate myself for having brought this upon her.' The rest of the letter runs along in a similar way, and depicts a misery that is too deep for words, and a hurt that does not like to be paraded before the community as an object for charity.

The trouble with all these cases is that as we move farther away becomes somewhat of a warped thing. It is not as great as it was, either personally or nationally. This young man to whom reference is made in the letter is one and the same chance for promotion that stands before any other man. He had his health and his ability to get out and work and do things. What has his country taken from

when men were needed, and when we used to sit up nights wondering how long it would be before some power would arise to stop the advance of the Germans.

Now, we are not making any appeal for assistance for this case. The point is far bigger than any one case. Simply this: There is so much said now about the tremendous debt in dollars this country owes because it participated in the world war that one would almost draw the inference that our part in the war should have been over the day the armistice was signed. As a matter of fact it will be some gen. say erations before the war is paid for some degree. The fact that a man road roller on the paths." rendered service overseas does not Shortly after a man tried to steal down on all fours and crawl to Gertreatment of returned men who need as his feet. help. It is a sacred obligation that this generation cannot pass on to ed around where a long hit was like on a street started to paint and fix

find one of these boys writing a good hand. This holds good in many parts of the province. It may be the fault of the pupil or it may be the fault of the system that has been changed many times, but in the end the result is there, and very plainly so. The fact that business is carried on almost exclusively with typewriters now may have some bearing on the case. Nearly every newsfrom the date of the war, our sym- paper office uses the typewriter exclusively, and this habit is being followed among editorial writers as well, who, as a rule, are the last word in poor exponents of penman-Preachers, professional men of many. Before he went overseas in many lines, clerical workers, and he had prospects of a fair position, many other lines have long since turned to the typewriter.

So it may be that pupils do not write well because it is figured out that they will not have to do much at it when they leave school. At him? The price has been practically the same time the ability to write everything except his life. He went a good, legible hand is a very valuthe limit in the matter of service able asset, and something not to be lightly considered.

RIAN. By Carolyn Wells. George Doran Company, Publishers, New York.

NO ONE had the faintest premonition of coming tragedy on that lovely summer afternoon when the picnic started out from Highland House, the picturesque old pile high up on a point of rock jutting out into the sea and connected with the which the Varians had taken for the

It was a very small party, given for the Varians' only daughter, Betty. The Varians, being new-comers, knew only a few of the habitues of Headland Harbor. But Rodney Granniss had met. Betty Varian, and they had fallen in love with each other, to the great displeasure of Frederick Varian, Betty's father.

That very morning the father and daughter had quarreled about Granniss, and he had been forbidden to come to the house. So, of course, he was not among the picnickers, who had all gone some distance down the steep and difficult path which was the one way of getting to or from Headland House, when Betty sud-denly declared she had forgotten her camera, and ran back to fetch it.

The others waited for her until their patience was exhausted, and at last her father went after her. He too, failed to reappear, and presently one of the young men in the party, Ted Landon, and Claire Blackwood a pretty widow, went in search of the delinquents.

They found Frederick Varianfound him on the floor of the hall a bullet through his heart. And Betty had vanished.

Both father and daughter had entered the house in full sight of the rest of the party, watching from the path below. All the servants had gone to a circus in a nearby town, and the house was deserted. There was no sign of an intruder; the cliff overhung the sea, and was absolutely unscalable; the only path was clearly to be seen by the watching party. For any one to enter or leave the house unnoticed seemed impossible. This is but the beginning of an involving and perplexing mystery,

which baffles all investigators until it is solved at last by the indefatigable Pennington Wise and his no less indefatigable assistant, Zizi. It cannot be said that the solution is entirely plausible, and the tale be-

longs to the jig-saw puzzle type of plot story. But it is entertaining and succeeds in its two principal obects-those of holding and puzzling the reader.

ONTARIO'S forest wealth is dwindling. Every year forest fires take disastrous toll. Careless campers cause eleven per

cent. of Ontario's forest fires. Last summer 112 cases of neglected camp fires were reported. This summer be careful.

Save Ontario's Forests They're Yours

DON'T take chances with fire in Ontario's forests.

DON'T throw away cisarette or cigar butts, pipe 'heels' or burnt matches until you are dead sure they are out.

DON'T neglect to drown out your fire with lots of water.

patenes; nor at the base of a tree.
Build it in a former fire-place, or on a flat rock, or on a spot cleared down to the true soil below, or by the edge of the water.

DON'T forget that the upper layer of ground in the forest consists of partially rotted wood which will burn.

When you build your fire to make tea, fry bacon or add cheer to pipe and story-telling time, use a woodsman's precautions.

The real woodsman builds his fire on an old fireplace, if there be one handy. Failing that he scrapes away all litter, moss and fibrous rotted wood down to the mineral soil, or the bare rock, and preferably some place close to the water. He knows that if fire gets into the moss or the upper woody layer of forest soil, or in a half-rotted log or stump, it "holds over," burns away unnoticed underneath, and unless followed up and carefully put out, is liable to break into a flame later. He knows how hard it is to put such deep-smoul ering fire out. So he makes his cooking fire surprisingly small and compact, and

chooses a spot that is absolutely safe. It is a mark of his finished woodsmanship how thoroughly he drowns his fire out with plenty of water when he is through with it. Save the forests. You near want to camp again.
