FINDS HER BOY AFTER 16 YEARS

Son Did Not Know Mother Was Alive. A Joyous Meeting

A meeting between mother and son after a sixteen years' separation was arranged and successfully carried out this morning when John Johnston of Innership, who was the father of the boy, was introduced to his mother, and a wife, who the son had no knowledge of until the meeting. The boy was then introduced to his mother, and the meeting was a joyous one. When five years old, the child was placed in the Berlin Orphanage, and there were two older and two younger children, and a wife, who with his death, would be left entirely without support. Directly after coming to Berlin the boy was placed with a kindly farmer, where he served a year's time. He then went to the home of Mr. and Mrs. Schmidt, Wellesley, where he has since remained. During this time, having no word from his mother, or not having heard of her, it is little wonder that he entirely forgot her, and his former home. Recently the mother wrote, asking if the Children's Aid Society could give her any information as to the whereabouts of her son. Miss Snyder of the Orphanage, looked up the records and found that sixteen years ago, the boy had left her care, and with whom he was placed. After securing the information there was little difficulty in finding where he was. The meeting took place at the home of a friend in Waterloo, where the mother was taken on arriving here. It was needless to say, a very joyous one, and a banquet was given in honor of the occasion.

The market was very poorly attended by farmers and buyers.

WILL LOCATE HERE

Mr. Frank Ellis, a well known Berlin boy who was formerly connected with the local electrical field has returned to the city after a trip to Winnipeg and Regina. For several years he has been associated with the Western Electric Co., of Chicago. With Mr. S. F. Howard of New York who has also been with the Western Electric Co., he will start an electrical business in Berlin, with an office at his home, 41 David Street. Frank's many friends wish him success in his enterprise.

They said that he has been greatly handicapped in his efforts by the present U. S. Administration and that he would rather get out than submit. Much regret is expressed generally in the United States at the news of the proposed retirement of Col. George W. Goethals, as chief engineer of the Panama Canal. Col. Goethals has formally notified the Isthmian Canal Commission of his desire to retire. It is understood that Col. Goethals, to whom much of the credit for the successful work upon the great ditch is due, has been greatly handicapped in his efforts since the inauguration of the present administration.

THE LIFE OF A FLY

By GLADYS E. NORTON, aged eleven, of State street school, Topeka. "Won't you come into my parlor?" says the spider to the fly. "No," says the fly to the spider; "I will bring you all kinds of diseases, such as typhoid fever and tuberculosis." "Well, I'll take the risk," says the spider. "No, I'll not come in, but if you will listen I will tell you my history, and then I am sure you'll not want me," replied the fly. "Well, my mother told me this much. She said I came out of a little egg laid with many others in a manure pile. When I was hatched I didn't have any legs or wings and was called a maggot by our worst enemies, men. I stayed in that form for five days. Then I had a thick brown coat and went into a

sleeping stage which was called a pupa. When I shed that I was like I am now, a full fledged fly. "You have often wondered why I did not get in your web or get caught by you. Did you know I had many eyes that are put together to make one? With these I can see on all sides, and so I am very hard to catch. "My worst enemies are you and your family, some beetles and a little red-dish mite. "I always lay my eggs in manure or other filth. The people are screening and burning it and burying it. They try to kill us by carbolic acid and sticky fly paper, where so many of my friends have ended their days. "People have some stuff, too, that they put in water and put in their bedrooms. They call it formalin, but I keep away from it, as it is sure death. "The worst trouble I have is where the people sweep their houses and keep their yards clean so we can't get anything to eat. "Our worst danger is not the carbolic acid or fly paper and such things, though, for a few are once hatched they can never kill us all off, but if they start out to destroy our breeding places—the manure pile and other filth—we will soon be gone from the earth. I hope men will never do that out, but I fear they will some day."
