

(Trade Mark Registered.)

HYCIENIO FOODS.

The June (1886) number of "The Canada Embroideries, Silks, Satins, Dress Goods, Medical Record," edited by Dr.F.W.Campbell of Montreal, says of "Our National Foods":

"These foods afford not only nutritions and delicate diet but also assist in laying the reals are trented in the light of all the scientific progress of the times. They contain a li proportion of diastase and the nitrogenous constituents so essential to the health and recommend to the body in the earlier stages of life, and for the reconstruction of terms 'run down' with dyspepsia and other affections of the digestive organs. We have the several of these foods and have no hesitation in recommending all the preparations this house as worthy the confidence and endorsement of our readers."

This is a great charactery.

ared from Choice White Wheat, brushed and sooured, and then decorticated so side woody fibre is removed but leaving the inside bran, which contains the nitrogen and phosphates. It is then put through a process of terrifaction by he starch is converted into dextrine. It is bulled, cooked and rolled, and is the on of human food for all season of the year. It will cure dyspepsia and is envalued as a delicious, healthy food, which supplies the wastes of the body.

DESICCATED ROLLED OATS
digested, more palatable and nourishing than any ordinary cat food.
steamed, as steaming this cereal destroys its hygienic properties. This
st and cooks in ten minutes. Many eat it like confectionery before cook-

SNOWFLAKE BARLEY a Fine Pearl Barley, crushed into white flakes, which cook quickly and afford an ex-lent article for soup, puddings, porridge, etc., and is very wholesome owing to the ge quantity of phosphates in the barley.

PREPARED PEA FLOUR, rted into Canada from Scotland and other places, is now made equipperson, so that all can enjoy this very palatable and easily digests and gravy.

BARAVENA MILK FOOD

For Infants and Young Children is a complete substitute for Mother's Milk. It is a Compound Preparation of specially prepared faring of the healthiest cereals, thoroughly insorporated with Concentrated Milk. It affords the most complete and nutritious food available for Infants, Young Children and persons of weak digestion. PREPARED BARLEY al to any imported and much chesper. It is used for children, invalids and others, a light suppers. Every family should keep this article on hand.

BEEF AND BARLEY EXTRACTS For eld people, invalids and others who want a condensed, nourishing drink. This pre-baration is made of the combined extracts of Beef and Barley, and is a, highly nutritious beverage, as it contains in a concentrated form all the elements of Flesh and Vegetable. Food. It is palatable, easily digested and eminently suited for all dietetic purposes, especially persons troubled with constipation or indigestion, and for nervous prostra-

Or prepared and Condensed Oat Flour, for children, invalids and others. This is an old standard food. It is prepared with great care and gives universal satisfaction. Like the Prepared Barley it should be on hand in every household for gruel and light suppers; prepared in five minutes.

GLUTEN FLOUR, Or Diabetic Flour, is highly recommended by physicians. It makes an excellent loaf and delicious muffins, used by parties troubled with diabetes and indigestion, as the starch in it is converted into destrine. Starch is the most productive material in the vegetable world next to wood. It is difficult to digest by many persons; the change of the starch in this flour renders it very useful for the purposes for which it is recommended.

WHOLE WHEAT FLOUR b different to Graham Flour as the outside bran is removed by decortecation. It makes a loaf 25 per cent. richer in nutriment than bread made with ordinary fine white flour. If bread is the staff of life, it must be made of flour that is not robbed of its best nutritive elements. This flour will make bread 20 grains to the lb. richer in potash salts than ordinary flour, consequently it will feed the bones, nerve centres, muscles, and by adopting it as diet with our prepared porridge foods, the dentist and medical men will not be required, as at present their valuable services are indispensable owing to had teeth, neural-gia, etc., produced by the want of proper elements in food.

BUCKWHEAT FLOUR. self-raising and more easily digested and wholesome than any ordinary Buckwheat Flour, as it is combined with Barley Phosphates. This renders it an excellent hygienic food. Buckwheat alone is too heating and hard to digest, so that many people cannot use it When combined with wheat shorts or adulterated with cheap offals of other cereals is not fit to eat, but combined with Barley Phosphates is a most excellent and delicious food.

ROLLED HOMINY is made of white corn, desiccated, hulled and rolled into thin, white flakes, which cook in a few minutes and saves time and fuel; besides, it is far more palatable than ordinary Hominy.

The proprietors of "OUR NATIONAL FOODS" are placing the cereal products of the sarth in such a healthful and inviting condition as to encourage their general use, and they think they cannot say too much in their favor; but they prefer to call the attention of those who have not yet used them to the more disinterested opinions and testimony of those who have, and are daily enjoying them. Below will be found the awards of medals, diplomary and first prizes at different exhibitions. It is becoming an established fact that families who cook cereals for themselves scarcely ever have them properly done. Our process of pooking makes the food ready for the table with but little attention, and makes it more palatable, nutritious and wholesome.

Either Medals, Diplomas or First Prizes have been awardd the Manufacturers at every Exhibition where they have entered for competition. A Silver Medal, the highest award, was given at St. John Exhibition, 1883. Ten First Prizes, three Silver Medals and Diploma in 1884.

At the Antwerp Exhibition, in 1885, the following was received: "I am directed by Sir Charles Tupper to express his gratification at being enabled to inform you that you have been awarded, by the Grand Jury of the Antwerp International Exhibition, a Bronze Medal for your Exhibit of "OUR NATIONAL FOODS."

At the Indian and Colonial Exhibition in London, in 1886, a similar award and similars were sant.

OFFICE OF THE PUBLIC ANALYST. MONTREAL, September 9th, 1887. o the Canada Sugar Renning Co'y, Montreal Gentlemen,—I have personally taken samples rom a large stock of your Granulated Sugar, "REDPATH" brand, and carefully tested them by the Polariscope, and I find these sumples to be as near to absolute purity as can be obtained by any process of Sugar Refining. The test by the Polariscope showed in yesterlay's yield 99.90 per cent, of Pure Cane Sugar, which may be considered commercially as absolutely PURE SUGAR.
