A CAZAR'S ADMIRATION

The condition of Russia politically, is well known to be most wretched. Autocracy is all in all, and the people are the wretched prey of those who can devour them.

All the influence which our family possessed in high quarters was brought to bear on the Czar, but in vain.

Can you swear before the Almighty God that neither you nor your associates had any criminal design against my life?

Can you swear before the Almighty God that neither you nor your associates had any criminal design against my life? Can you swear that you believe in the holiness and eternity of the Russian autocracy?

As soon as the prisoner had recovered from his unbounded surprise, he answered: "I can swear to your Majesty that neither I nor any of my friends had the remotest thought of such a thing."

Can you swear to your Majesty that neither I nor any of my friends had the remotest thought of such a thing? By reason of the confusion, and the knowledge that whatever had happened, they must prepare to die, if need be, without opening the partition doors, in order to save the ship.

"This is a token of respect from your Czar. You have been sincere and truthful to me; and there is nothing I hate so much as a lie."

He then approached his writing-table, on which the sentence of the court concerning my relative was lying, and with one stroke of the pen—signed the paper!

"I pity you from the bottom of my heart," he said; "you are an honest man, and an honest man, true to his convictions, is more dangerous to autocracy than any unprincipled scoundrel."

A TURKISH DINNER. Having no lady to look after, the guest need not stand on a ceremony—indeed, he need not stand at all.

A SINGULAR TRANSIT. Astronomers are not always content with predicting transits of the inferior planets visible on the earth.

Astronomers are not always content with predicting transits of the inferior planets visible on the earth. At the meeting of the Royal Astronomical Society, London, Mr. Marsh called attention to a phenomenon occurring this year, which though it could not be seen here, possessed perhaps at least as much interest to astronomers as a total eclipse of the sun, visible only near one of the poles.
