ENGINES AND BOILERS.

- 59.—Four Horse Power Doty Gas Engine.

Machines marked (*) in stock at Winnipeg Branch.

Old Type

Received in exchange for new at following prices, delivered at the foundry, less five per cent. for tret:

Old Type, - - - 9 cts. per pound

Old Plates, etc., - 5 " "

These are the most liberal prices quoted in Canada, and are made so in order to encourage printers to discard their old material and replace it with Point System type made by the Toronto Type Foundry. Zinc must not be put in with type.

Old type must be packed separate from plates, hell box contents, etc. If mixed with inferior grades the lower price only will be allowed.

Tret, as applied to old type, etc., is the refuse or dirt in the metal. In melting down one hundred pounds of old type or plates the furnace rarely yields more than ninety pounds of metal. Thus the type founder loses about ten per cent. of the quantity received from the seller. To compensate for this loss, the custom of the trade is to deduct five per cent. from the weight, and thus each party bears one-half the loss. Where there is an unusual proportion of refuse in the shipment the tret deduction is larger, but in ordinary cases five per cent. only is taken off.

Our plant was purchased from that well known firm, the Toronto Type Foundry, of Toronto, and every font is on the point system, which facilitates work in a country office besides saving great expense in having advertising and job type to work together. Notwithstanding our visit to the different type foundries and supply establishments of Toronto we found that we could deal fully as well in Winnipeg with H. C. Stovel, agent for the Toronto Type Foundry. Mr. Stovel is well known throughout Manitoba as a straightforward business man who is certain to secure and retain the confidence of his customers. Knowing that the skilled mechanics required in the manufacture of this type have been brought from Great Britain, Germany and the United States and that its durability is guaranteed, the News heartily recommends the Toronto Type Foundry to Manitoba printers, feeling assured that all its customers, through Mr. Stovel, will meet with perfect satisfaction and the best of treatment.—Carberry News.
