

Mr Quinn sent us this spring some scions of a Japanese pear which he said was worth growing for the beauty of its foliage. The leaves are of enormous size, about as large as one's hand, and of a fine, glossy green, which in autumn turns to a brilliant scarlet. We have not seen the fruit and do not know what species of pear it is, but it is highly ornamental, either in its green dress or in its flaming colors.—*American Agriculturist*.

INSURES ONLY PRIVATE RESIDENCES,
HOUSEHOLD FURNITURE AND
FARM PROPERTIES.

The Agricultural makes a speciality of insuring Farm properties, having introduced the system of issuing policies for one, two and three years, so that the Farmer may not have the trouble and responsibility of renewing his policy each year.

The Agricultural does a strictly non-hazardous business, and will not insure stocks in trade, public buildings or manufactories of any kind, is thereby enabled to insure private residences and farm properties at exceedingly low rates. For instance—a barn worth, say \$500, may be insured for \$40, for the term of three years, on payment of one premium of \$8, being only 2 per cent. for three years. Farm stock of all kinds insured at the same rate.

Farmers protect yourselves and families by insuring.
