Early in January the Bank of England declined to make advances on bills of longer date than 2 months,—an indication of rates tightening. When a better feeling was beginning to prevail, the United States Senate disturbed the country by declaring in favor of a free issue of silver. Then they increased the mischief by voting in favor of the recognition of Cubans as belligerents, which would have led to war with Spain, had the President taken action on the lines of the Senate's resolution. After the convulsion caused in December over the Venezuelan incident, Mr. Cleveland wisely kept quiet about Cuba, respecting which Island and the policy of the United States in regard to it, there still

remains an uneasy feeling which keeps the money market very sensitive.

During the pear the Ontario Bank reduced its capital from \$1,500,000 to \$1,000,000, a policy which was adopt ed after consultation with the largest shareholders. Hopes are entertained that by this drastic course, the assets of the bank have been brought down to "hard pan," upon which Mr. McGill, the new general manager, is sanguing a profitable business can be built up.
