

MEADS ADHESIVE PLASTER

SEABURY & JOHNSON

This article is intended to take the place of the ordinary Emp. Adhesive, on account of its superior quality and cheapness. It is pliable, water-proof, non-irritating, very strong, and extra adhesive. It is not affected by heat or cold, is spread on honest cotton cloth and never cracks or peels off; salicylic acid is incorporated with it, which makes it antiseptic. It is indispensable where strength and firm adhesion are required, as in counter-extension, or in the treatment of a broken clavicle. It has been adopted by the New York, Bellevue, and other large hospitals, and by many of our leading surgeons.

Furnished in rolls 5 yards long, by 14 inches wide.
" 1 " 7 1/4 "

Price by mail, per yard roll, 50 cts., 5 yards 40 cts per yard.]

BELLADONNA PLASTER

SEABURY & JOHNSON.

IN RUBBER COMBINATION. Recent analytical tests conducted by Prof. R. O. Doremus, of Bellevue Hospital Med. College, and J. P. Battershall, Ph. D., analytical chemists, New York, to determine the comparative quantities of atropine in Belladonna Plaster, prepared by the different American manufacturers, disclosed in each case that our article contains a greater proportion of the active principle of Belladonna than any other manufactured. Samples of the various manufactures, including our own, for this test, were procured in open market by the above named chemists themselves. In the preparation of this article, we incorporate the best alcoholic extract of Belladonna only, with the rubber base. It is packed in elegant tin cases, (one yard in each case), which can be forwarded by mail to any part of the country.

Price, by mail post-paid, \$1.00.

BLISTERING PLASTER

SEABURY & JOHNSON

IN RUBBER COMBINATION. We incorporate, by a cold process, the whole fly (best selected Russian), with the rubber base, which constitutes, we believe, the most reliable cantharidal plaster known. It is superior to the cerate, and other cantharidal preparations, the value of which is frequently greatly impaired by the excessive heat used in preparing them, which volatilizes or drives off an active principle of the fly. By our peculiar process, no heat is used.

Price, by mail, per yard, \$1.00.

MUSTARD PLASTER

SEABURY & JOHNSON

IN COTTON CLOTH. Superior to the best French makes; does not crack or peel off, or tear when wet. Can be removed without soiling the skin. Always reliable.

ALL THE ABOVE ARTICLES TO BE OBTAINED OF CANADIAN DRUGGISTS AT PRICES MENTIONED.
