

FOR BIG GAME

we can recommend the following rifles: **Our 30-30 Smokeless**, using our 30-calibre Smokeless cartridge, which is loaded with 32 grains of Military Smokeless Powder, giving an actual velocity of 2,000 feet per second. This cartridge is extremely accurate, showing targets which are not surpassed by the black powder target cartridges, while of course with a soft pointed bullet the tremendous energy developed by the velocity can be utilized. We believe that this is without a superior as a hunting cartridge, and know that it cannot be surpassed in accuracy. Our big calibres,

namely, 45-65, 40-70, 40-82, 45-70 and 45-90 take these well-known cartridges, which for years have been used and are very popular all over the globe. We

can recommend these rifles perfectly.

Then, too, in the Model 1893 we also have the good old 32-40 and 38-55 cartridges. These are too well known to need description.

All of these rifles have barrel and action of our Special Smokeless Steel, guaranteed to the highest requirements, giving more worth for the money than can be found in ordinary rifles for these cartridges.

Our new catalogue is a veritable encyclopaedia of information regarding ammunition, rifles and similar subjects. Free for the asking, but stamps are acceptable as they help to pay postage.
