We are leaving at your homes within the city of Toronto our catalogue and price list. To read it carefully will bring you to our stores, and to come will make you a customer. We leave it with you inside your house, not outside, clean and nicely folded. Hoping you will read and find to your advantage.

You will find it to your advantage and in the future will be glad when we come.

To be an advantage to us our stores must be a real advantage to you, and this is our constant work to make them such.

To anyone overlooked or outside the city we will consider it a favor if you will notify us when we will forward you a copy free.

Those at a distance will remember that sample articles and books cost only 1c. each for 4 oz. or 4c. a lb. by mail. To distant places this is cheaper than freight.

We have added some attractive new lines since our last issue, and reduced the price of a large number of former lines. Read, come and see us and you will be glad.

Practical Problems

IN

ARITHMETIC.

For First, Second and Third Classes.

By **JAMES WHITE**, Public School Teacher

EDMONTON, ONT.

This book has been prepared specially to suit the convenience of Public School Teachers. It contains about 700 Practical Problems suitable for First, Second and Third Classes in Public Schools. It is very carefully graded, and each principle required to be taught is introduced in logical order. It receives the hearty approval of Teachers and Inspectors.

Read their Opinions.

From **ALLAN EMBURY, Esq.**, Inspector, Peel.

I have examined this little book of Arithmetical Problems, and can give it an unqualified endorsement. The questions are carefully graded, and are specially suited to the wants of our over-worked teachers who have not always the time to devote to the preparation of exercises upon the various subjects of the school curriculum. The questions are not stated in the form of propositions; but their statement is incidental, leaving the inner connection of the problems to be discovered by the pupil himself; and in this important feature lies their special adaptability as an educational force. I heartily recommend this book to all teachers wishing to economize time and labor in their preparation for ordinary school work.

From **E. TROUGHT, Esq.**, Teacher, Member County Board of Examiners, Inglewood.

I have examined with some care Practical Problems in Arithmetic for First, Second and Third Classes, by Mr. White, Edmonton. Without the slightest hesitation I say that they are the best I have ever seen—the best in selection, the best in grading, and above all, the best for developing the reasoning powers of the child, and for exercising his ingenuity. A special feature of the grading is that principles which have been introduced are being constantly made use of in the succeeding problems which are in their turn introducing new principles, so that the whole work may be said to be one unconscious review. It is a great boon to Teachers.
