

Other Features of Canadian Urban Areas

Varied Cultural Activities – Canadian cities boast high-quality live theatres, movie theatres, music and dance companies, art galleries, museums and public libraries. Canadian cities are home to ballet, opera and orchestral companies that tour to international acclaim, and also host visits from the finest performers from around the world. The U.S. National Endowment for the Arts found that Canada was a leader in per capita public support for the arts, among Western countries with independent arts councils.

Efficient Public Transit Systems – Canadian cities are known for their clean and efficient subways, commuter rail and bus lines, and modern, well-maintained highway and road systems.

Cosmopolitan Environment – Canada's cities bring together European, Asian, Latin American and African cultures. Vancouver boasts a major Asian community, for example, and Toronto is a blend of European, Asian and other cultures, while the Province of Quebec brings a bilingual (French-English), European flavour to North America. International executives are able to enjoy both North American and their traditional home-country cuisine, entertainment, and literature in Canada.
