

We have about twenty students taking post-graduate work at the present time. Ten scholarships provided by the W. C. Macdonald Company Registered, three by the Quebec Department of Agriculture, one by Dr. Milton L. Hersey, one by the graduates of the College, and several others which are open to agricultural graduates, but not necessarily tenable at Macdonald College.

As a result of the facts mentioned here, and many others which I have not quoted for the sake of brevity, I beg to recommend:-

1. That endeavour be made to secure students in Great Britain:
2. That Professor Lochhead be permitted to go to the Old Country, without expense to the institution, in order to obtain students, giving publicity to our institution, etc.:
3. That post-graduate work be encouraged, and that instruction in this work be strengthened as soon as it is possible by better provision for basic subjects.

Macdonald College, P. Que.
