Buys Health Automobiles

TORONTO, July 12.-Hon. Walter Rollo, minister of labor and health, has purchased sixteen motor cars for the department of health from a Dundas dealer, at a cost of something under \$20,000. The purchase has been made through the good offices of Hon. F. C. Biggs, minister of public works, whose purchase of motor trucks from a Dundas dealer some time ago was criticized because Dundas is Mr. Biggs' riding. It is claimed that through Mr. Biggs the health department was able to get a better price than might otherwise have been the case.

The cars are to be used by the district officers of health and the nine or ten nurses who are to organize throughout the province, in the smaller centres, community health

NEW POLICE STATION MAY TAKE VOTE IS IN ORDER NOW ON PURCHASE OF

Present Building Is Entirely Inadequate For City's Needs.

WAS BUILT 41 YEARS AGO

Motor Cycle Cops To Chase Speeders Are Also Required.

A prominent citizen makes the suggestion that when a new chief of police for London is appointed the civic authorities at the same time should take steps to erect a new police station. The present structure, which was built able bearing on the street railway probsteps to erect a new police station. The present structure, which was built in 1881, is regarded by all in touch with police neadquarters as entirely inadequate for the city's needs.

When about to be built 40 years ago When about to be built 40 years ago the police station on Carling street was planned to meet the requirements of that era, accommodation being provided for but sixteen constables, the strength of the force at that time, and the said accommodation has not been increased since, although the number of constables on the force now that the first regular meeting of the city to take a vote of this nature at any time.

No official move for an election has been made yet, although it is possible that the question may be raised at the first regular meeting of the city that era, accommodation being provided for but sixteen constables, the strength of the force at that time, and the said accommodation has not been increased since, although the number of constables on the force now numbers more than three times that of 1881. The offices built at that time are still in use, but everyone is cramped in the work, particularly the detective department, which is housed in a dingy back room.

Many Had to Stand.

Regarding the police court room proper, on Monday, when a case of local interest was heard, the chamber

Many Had to Stand.

Regarding the police court room proper, on Monday, when a case of local interest was heard, the chamber was taxed beyond capacity, many spectators being required to stand in the halls. With a host of witnesses occupying the spectators' seats, the frequenters of police court who do not attend by invitation are often denied their privileges by lack of space. The prisoners' box is often crowded, the overflow of unfortunates being seated with the witnesses.

Even the space in the garage at the rear of the station, where the police autos are parked, is at a premium, the officer in charge taking a special course in manoeuvring the patrol at each call.

Favor New Station.

Favor New Station.

Officials at the police headquarters here are heartily in favor of a new station, but entertain the opinion that things will have to be much more progressive locally ere it becomes a reality. They declare that the present site is an ideal one, situated in the business district and on a back street, but the grounds are far too small to house a structure in keeping with the present-day needs. They veto the suggestion of having police headquarters in the same building as the new city hall, pronouncing this experiment a failure in other cities where it was tried out.

In the opinion of the officials a subpolice-station in East London is also police-station in East London is also.

Building a dam would make condi-In the opinion of the officials a sub-police-station in East London is also a necessity. They point out that a few years ago excellent quarters, involving an expenditure of \$500 for equipment, was available in the East London town hall, but the authorities hesitated to Suggest Motorcycles.

Other innovations required here, they say, are motorcycles, to facilitate the capture of speeders, and they declare that the machines would pay for them-selves in fines in a month. Mounted po-lice are also deemed necessary by police officials, who maintain that they could supplant the motorcycles to a certain extent in the winter, and in summer could be used to patrol the outlying dis-tricts which at present are neglected because of the fact that they require several extra constables to patrol them, and such patrols would be unusually long with every chance of lawbreakers

GOVT. IS ENCOURAGING CO. OPERATIVE MARKETING

Marketing Loan Act, 1920," recently passed by the Ontario Government, are substance the new act, which is intended to encourage co-operative asso-ciations in preparing agricultural pro-ducts for markets and effecting their provides that: "The lieutenant-governor in council, upon the recommendation of the minister, may make a loan to any co-

operative association, in accordance with the provisions of this act, for the purpose of acquiring lands, buildings, equipment and machinery necessary for carrying out of the objects for ch such association was incorporated to an amount not exceeding \$3,000.
"Such loan shall not exceed 50 per cent of the appraised value of the property upon which the loan is to be

for a period of two years, after which time interest shall be payable at the rate of 6 per cent per annum, for the balance of the time for which the loan

Such loan may be repaid at any time at the option of the association, but at least 50 per cent shall be repaid at the end of five years from the date the loan, and the remaining 50 per the end of a further period of

CLOSING ADMIRALTY OFFICES. Vancouver, B. C., July 13.—Admiralty offices in Vancouver, in existence for three years, will be closed on July 31. When first opened they were in charge of Commander De Wet and latterly of Commander Redcliffe. The latter has, as et, received no word of his future du-

instead of only on January 1.

Building a dam would make cond Building a dam would make conditions worse, as it would hold back a large volume of the polluted water One sewage plant is already in operation in the city and is proving successful. It filters sewage in such a wa that the water which passes into th that the water which passes into the river is in practically a pure state.

City Engineer Brazier said today that if a move was made to rebuild the Springbank dam that the city work department would not be behindhand in preparing plans for a sewage disposal plant, which would insure the river water being ciean. water being clean.

MAY HAVE TO REMODEL ALL SLOT MACHINES

several extra constables to patrol them, and such patrols would be unusually long with every chance of lawbreakers getting away with their nefarious work. If the mounted police were authorized, stables for the horses used by them would be necessary, and these could be erected in conjunction with the proposed new station. There is no available accommodation for them at present police headquarters.

GOVT. IS ENCOURAGING that no arrangements are yet in view for the reconstruction of these ma-chines for operation by the smaller coins. Some of them are manufactured Copies of the new "Co-operative in Canada, and will probably be collected and sent back to the factories.

Others are manufactured in the United by States and will be to be replaced by new or rebuilt machines on which ad now available from the branch offices of the department of agriculture. In

SETTLEMENT BOARD WILL END SEPT. 1

After several years of service among the returned men of the district the local office of the soldiers' settlement board will go out of existence on Sepment made today. The soldiers se tember 1, according to an announce-ment made today. The soldiers' settlement work throughout the province will be looked after by one central of-fice located in Toronto after that date. The offices here have been in operation since during the war. They have building, and have been under charge of Capt. Hardy of this city.

NEW ENGLAND STATES LOOK FOR CONTINUED SPELL OF PROHIBITION

New York, July 13.—By the Canadian Press.—Under the caption, "New Bruns-wick Decides to Prohibit," the Times this morning discusses the result of the recent referendum in New Brunswick. The newspaper says the return of the Canadian troops from overseas has apparently made no relative change in the wishes of the people of that province,

"As there is no appreciable difference between the people of New Brunswick and New Englanders, except that the former call 'loyalists' those whom the latter call 'tories,' there seems to be small chance indeed of doing away with each way, will be operated by the dryness on this side of the frontier line P. R. and the M. C. R. between at its eastern end."

INTERIM INJUNCTION CONTINUED. Halifax, N. S., July 13 .- Judge Méllish, in supreme court chambers today continued until Friday next the interim injunction against striking marine workers picketing the entrances to the Hali-

fax shipyards.

This New Cement Makes A Superior Silo, Well, Trough

-Because It Is Waterproof Absolutely

IN building construction where absolute waterproofness is imperative, the new SUPER CE-MENT will fill a long-felt need.

This new cement was fully tested during the war and gave complete satisfaction in waterproof construction work for the Beitish Admiralty, Air Ministry, War Office, Public Works, etc. SUPER CEMENT is now being manufactured in Canada.

New Process The Reason

SUPER CEMENT secures its efficiency from a patented new process which greatly improves Portland Cement, and so increases its efficiency that it becomes absolutely waterproof.

This new process gives SUPER CEMENT a greatly increased bonding action. It enables SUPER CEMENT to adhere with greater tenacity to the particles of sand and stone and to bind them together in a stronger, denser waterproof mass.

In farm construction work, there is a big field for this new waterproof cement. Take Silos for example:-A silo should be waterproof

absolutely-not only to keep out the rain, but also to prevent the moisture and acids contained in the silage from percolating through or being absorbed by the silo wall.

Tests have demonstrated that SUPER CEMENT Concrete is in permeable under a waterpressure of 200 lbs. per square inch and a gasoline pressure of 130 lbs. per square inch. other words, it is absolutely waterproof, acid-proof, and nonabsorbent even of odors. SUPER CEMENT is ideal for

wells, springs, and troughs sanitation, cleanliness, durability and absolute watertightness are essential. For root cellars, hog pens, barn foundations, feeding floors

and ordinary concrete floors, etc., the waterproof, sanitary and durable features of SUPER CEMENT are of supreme value. Don't be content with anything less than SUPER CEMENT. Complete information, details of tests made by English and

Canadian experts, etc., will be

supplied on request. Address:-

Super Cement (America) Limited, Mount Dennis, Ont. Distributors: Alfred Rogers, Limited, Toronto, Ont.
