

BOARD AND EDUCATION !

CARADOC ACADEMY**ESTABLISHED 1832.**

THE Principal of this Institution, in tendering his grateful acknowledgements for the very flattering support he has received for so many years in which he has had the honor of training numbers of fine youths, most of whom are now filling situations of trust and respectability in many parts of the Province, would intimate that it is his intention, with the view of increasing the efficiency and at the same time facilitating the enforcement of the RULES OF THE SCHOOL, very materially to reduce the number of his pupils. Instead, therefore of ranging from fifty to sixty, as of late has generally been the case, not more than from 30 to 40 pupils will be desired; but as the reduction cannot be made *instantly*, no fresh applications will be entertained until the present number attending school be reduced within that limit; and he, therefore, respectfully requests parents and guardians intending to withdraw their children, to intimate the same *by letter*, that he may regulate himself accordingly.
