The newspaper says its informant declares that the Americans in the last few weeks have reported to Washington that their ration tickets are useless, as there is little or no food to ration the nation and that the action of the American government in hastening supplies of food to them is only interpreted in the light of showing that the American embassies and consulates now regard the food situation in Austria and Germany with the greatest possible arxiety.

In an editorial dealing with this story the Daily Mail says it explains the "peace intrigues which the Germans are fomenting in the United States and elsewhere," and urges the British government to exert every possible pressure, especially the tightening of the blockade to prevent Germany from laking advantage of the seizure of the rorn lands of Roumania.

The supply of Bavarian beer for Prussia and the rest of Germany again is threatened with curtalment. Fifty thousand German hotel proprietors petitioned the government to refrain from cutting down the supplies of malt and other cereals to the Bavarian breweries, because their existence, and that of hundreds of thousands of their employees depended on the uninterrupted flow of Munich and similar beers. The government will read this latter statement with great interest, as the new civil service bill provides a remedy for just such people as are here threatened with the loss of their jobs.
