

# POOR DOCUMENT MC 2035

THE EVENING TIMES-STAR, SAINT JOHN, N. B., SATURDAY, SEPTEMBER 11, 1926

## SUGAR CANE NOW BEING USED FOR BUILDING WORK

M. F. Parsons, Head of Plant,  
on Visit Here, Speaks  
of Operations

How sugar cane is treated scientifically for many varied uses in construction work at the only plant of its kind in the world, at New Orleans, Louisiana, and how in five years the demand for this product, known among the trade as "celotex," has spread to all parts of the world, was related to a Times-Star reporter by Mauran P. Parsons, general superintendent, who was in Saint John to visit his father, Captain Frank Parsons. Mr. Parsons has left for Mill-

Innocent, Maine, to visit friends there in his home town before returning to New Orleans.

### CHARGE OF BIG PLANT.

Although still in his early thirties, Mr. Parsons is charged with the responsibility of a plant that cost \$5,000,000 and which now employs 400 men in the operating division and 1,500 men on the outside. The plant now covers an area of 180 acres, with six miles of track in its yards. It was started in August, 1921, with a capacity of turning out 60,000 feet of celotex a day and today its output totals 200,000 feet a day. Mr. Parsons said the growth of the industry has been so encouraging as to cause the directors to commence building operations several months ago on additions that will give the new plant a daily capacity of 600,000 feet, which with but few alterations will be stepped up to a maximum capacity of 1,200,000 feet a day. Four hundred additional men will be employed when this plant starts operating.

## TRY IT YOURSELF THOUSANDS OWE THEIR HEALTH TO "FRUIT-A-TIVES"

**MR. ALPHONSE COOL**

"Every person suffering from Constipation or Indigestion should take 'Fruit-a-tives' and I am positive that they will soon feel in the best of health. As for myself, I have tried nearly every other kind of remedy and have come to the conclusion that 'Fruit-a-tives' is the best. Mr. Alphonse Cool, 2322 Lafontaine Street, Montreal."

Because "Fruit-a-tives" is a genuine fruit medicine made from fruit juices, intensified and combined with tonics — it corrects constipation, stomach, kidney and bladder troubles, in a natural way, and purifies the blood. No other remedy can be the same as "Fruit-a-tives" at dealers everywhere.

IS POSTPONED  
In court yesterday afternoon, the Magee building, Charlotte street, case relative to exits was set over till next Friday afternoon.

ONE prisoner at the county jail said he had a conscientious objection to breaking rocks, and quoted, "What the Lord hath joined together let no man put asunder."

# The Wonderful Story of the Whippet

### How the Vision of One Man revolutionized the entire trend of Motor Car Design

JUST two months ago the Whippet—combining the most advanced European and American engineering thought—made its first appearance on the streets and highways of Canada. Its instantaneous success and the remarkable interest shown in the new engineering era it forecasts—is the greatest single tribute ever paid to the vision of any one man in automobile history. The international evadon given the Whippet marks the climactic achievement of a modern engineering program laid out by John N. Willys in 1922.

**An Engineering Triumph**

In one complete line of cars, covering the buying needs of every family, he has now incorporated the most advanced principles of European design—the highest standard of quality—the final word in modern efficiency. For the benefit of the automobile buying public, he has incorporated in these new-type cars all of the great accomplishments which European engineers have brought about unhampered by mass production.

John N. Willys was the first great American automobile manufacturer to recognize why most of the outstanding developments in automobile design, year after year, were coming from Europe.

**The New Trend**

He saw that the absence of mass production, coupled with a highly developed apprenticeship system, made possible constant experiment and constant improvement. He saw that the high cost of gasoline and high taxes were forcing European development along lines of intense economy, while American manufacturers were struggling with huge volumes of standardized models whose design has been little changed since the war.

Four years ago he set out with a definite plan to revolutionize Willys-Overland automobiles along these modern lines.

And now the introduction of the Whippet is a matter of history.

Spurred on by its great success other manufacturers will doubtless attempt to come out with Whippet-type cars.

But remember this one important fact we pointed out to you in our first announcement 2 months ago.

It took the Willys-Overland engineers, in Europe and America, four years to design and build the Whippet.

A big car with little wheels is still a big car. It lacks those things which make the Whippet the most economical of all cars to own—the safest and by far the most thrilling of all light cars to drive.

So do not expect Whippet advantages in any other light car.

**Today the Whippet—and the Whippet alone—offers you these unique engineering attainments**

35 miles on a gallon of gasoline—55 miles an hour. Acceleration, 0 to 30 miles in 13 seconds. Four-wheel brakes (for the first time universal standard equipment on any light car)—stops in 8 car lengths from 25 miles an hour.

Easiest of all cars to park—turns in a 3 1/2 foot circle. Only 5 feet 8 inches high—lower gravity centre—greater safety.

European-type body—smaller external dimensions with more leg room than any other Four-Cylinder light car.

Complete symmetry of design has been achieved with compact external dimensions.

Compared with contemporary, big, bulky cars the Overland Whippet appears smarter and much more graceful. That's because height and length are in true artistic proportion.

**A Notable Difference**

In the Overland Whippet you have the feeling of riding closer to the ground—with the resultant sense of solidity and absence of that sideways go noticeable in the conventional type of car. That high-up-in-the-air feeling is gone—here is a new kind of riding comfort. Step into this car and you will be surprised to find so much spacious room.

In every respect it is entirely different from all other light cars being built to-day.

In Europe, people are accustomed to paying \$1,500 to \$1,800 for a car of this size and quality. Yet today, because of the tremendous manufacturing facilities of Willys-Overland, it sells in Canada for practically half this price. The Whippet is available in Coach, Coupe, and Touring Models.

You owe it to yourself to see this amazing, new-type car before buying an automobile today.
