

attending, to take charge of the services again this winter. The collections average \$1.05 per service, and these supplemented by generous subscriptions from members and friends in the district, suffice to pay all expenses connected with these meetings. The School closed during the months of July and August, but "Children's Services" were conducted by the Teachers living in the immediate vicinity of the School, and were very successful. The Treasurer's report shows a balance on hand at the end of the year. Notwithstanding that a new furnace had to be put in to replace the one used since the chapel was built.

At the commencement of the year the young Ladies connected with the Sunday-School, organized a "Cheerful Workers' Society" with the express object of maintaining a Scholar in the Pointe-aux-Trembles Schools, for a term of years, at an annual cost of \$50. It is pleasing to state that already sufficient has been raised to cover this amount for two years. Would that more had the spirit and earnestness of our "Cheerful Workers' Society" in doing missionary work at home or abroad.

The Ladies of the School and district have under contemplation a Bazaar to be held during the coming year, the entire proceeds of which are to be devoted to reducing the present mortgage (of \$1200) on the building. In this effort they ask the support and countenance of the members of our congregation.

Arbour Day in May last, was celebrated by the Scholars and Teachers planting some 30 trees in the vacant lot, and around the Chapel on the street front. The expense was borne by gentlemen teachers.

JOHN LARMONTH.
