MORAL ADVANTAGE RESTS WITH JAPANESE.

St. Petersburg, Aug. 30 .- "A great diplomatic victory for M. Witte, but a great carried out his task with the greatest skill and obtained from Japan the utmost she was prepared to give. More we expected to receive, but though M. Witts wrested out of defeat these advantageous terms, the moral advantage rests with Japan. She will be recognized in the East and in Europe as the victor, and she has acquired a prodominant position in Asia, while Russia's prestige has suffered a correspondingly heavy blow. However, Russia is only reaping the reward of war conceived in injustice, and resting on a policy of aggression towards a weak nation, against which I and to have given her word to China do not be remunerated.

The question of the ultimate possession of the road is a matter to be settled between Japan and China. Japan can keep the road or surrender it to China, demanding in return the money paid by Russia to China. If she selects the latter course Japan will therefore obtain an indirect spoil of war from Russia, in addition to reimbursement for the cost of maintaining the Russian prisoners of war, for which Japan will present an itemized bill. The morning dawned clear and fine, except that a thin bank of cloud lay just above the Sir Michael Hicks-Beach and Lord eastern horizon, but exactly where the sun was to rise. A gap in the clouds obligingly opened about 5.30 a.m., and the Zodiac light was plainly visible over this gap. At about 5.35 a.m. grey darkness began to fall on the dawn of day, when from the south there crept a mighty shadow like the rays of a negative searchlight moving rapidly northwards, and the little clouds grew rosy. Presently the bright rim of the upper edge of the sun on the right hand looked over the edge of the world. Then the dark convex rim of the moon followed. Both luminaries finally cleared, the horizon revealing an eclipse just short of totality, which lasted till 6.30 a.m. Winnipeggers, Disappointed.

Winnipeg, Aug. 30.-Low lying clouds along the edge of the horizon caused disappointment to hundreds of residents who arose early to-day to view the eclipse of the sun from its starting point near the city. Prof. Winslow Upton, of Brown's university, Providence, R. I., had erected instruments at St. John's college observatory, but the results were disappointing.
