White's budget than Hon. W. S. Fickung.
The splendid tariff arrangements and adaptation made by him during his fifteen years as Minister of Finance have made the pathway easy for his successor. The Liberal case by a most elequent oration. Liberal case by a most eloquent oration.

Among other things he said:

"There has been too much special pleading throughout the whole matter. Oan de promises a billion dollar Budget within the life time of many now living. Our foreign commerce is now over one quarter that of the United States and growing with amazing rapidity. The last of our Federal revenue and fits rapid expansion are arguments in favour of some lightening of Customs throughout the word of an ember for Cape Breton. He had no power to tignore the rights of that member for expectable to the member for Cape Breton. He had no power to tignore the rights of that member for the promise granted to West Indian exports to nces granted to West Indian exports t this country, the schedules remain practically as they were, Some trifling increases were made in the British Prefer-Sugar has not been made free, ither raw or refined. To compensate for however, such articles of general Work.

Another very noticease think was the continuit increase of our trade with the United States, which now aggregates nearly 587 millions, over 435 millions being imports. And right hereities to be noticed that the Finance Minister pointed out that the "so-called adverse balance of trade against Oanada" was of no signifi-cance whatever since it was counter-balanced by the capital brought into Canada by American settlers. And to our samplise, the Tory press has no sbudder whatever over the fact that our imports generally are nearly double our exports, of ex-chorus girls will do evangelistic

ing "Emergency" and the help of Briscore millions, the Tory press is preaching a very different doctrine in Quebec. In that province the people are being told that Mr. Borden is merely hoodwinking that Mr. Borden is merely nonumerical given attention. The Standard has, where the permanent policy of defence and that the permanent policy of defence and that the thirty five millions voted are quite likely the number the

not to be spent at all. At the utmost the money will be paid over to the Admiralty and that will put an end to all further agitation regarding Naval Defence. Such is the doctrine now being taught in Quebec. On May the second, "L'Evenement," the Ohief French Conservative paper, said editorially:

"It is sufficient to read this naval bill to "It is sufficient to read this naval bill to they were married first at Eilis Island, the editorially:

"It is sufficient to read this naval bill to grasp the fact that there is no real question of sending a single cent to England, but only a mere appropriation of a fixed aum which the Government may spend in any way it pleases, and which it need never spend at all if circumstances change some of these days; for the bill specifies no date, place or conditions, or even any obligation to spend the money. Liberals this may be a sufficient that the canadian vessels could not be commenced before a couple of years. Moreover, it is well known that when the

Moreover, it is well known that when the

1910 a year and a hait elapsed before the
penders from the naval contractors were
taken into consideration; it would have
been two years more, had these tenders
been accepted, before the actual construction of alips would have been begun. Prohably it would be the same with the ships
which the present Government will be
authorised to have constructed, should the
Act were become really operative."
Thus speaks the Quebec organ of Hon' Act ever become really operative."

Thus speaks the Quebec organ of Hon'
L. P. Pelletier, proclaiming that the Borden policy is bluff pure and simple.

Another Tory paper, "La Semaine," the

great admirer and defender of Deputy Speaker Blondin, puts it this way : Speaker Blondin, puts it this way:

"The result would inevitably have been the ruin of this Nationalist policy, whose principles Mr. Borden has guarded and respected in the present bill, as in all his speeches. The important thing is not to engage ourselves in the construction of a navy which it will be necessary to continue to maintain once it is established but to wait for the decision of the tribunal of The Hagnes without some promising ourselves. It will be time amough then to again and to pledge ourselves; till that time the Government wishes to temporise, and the present bill has no other aim. NEW TACTICS IN BASEBALL.

Oatcher Miller of the Brooklyna is throwing to bases with such deadly effect that Manager Dahlen has decided to stop the practice of wasting balls when opponents are on bases in order to enable the catcher to break up the hit and run game.

Dablen has decided to enable the catcher to break up the hit and run game.

Dablen has convinced that Miller can throw to second base from almost any position. The Brooklyn pitchers, therefore, have been instructed to put the batamen in the hole as quickly as possible instead of paying the usual attention to runners on the bags. Dahlen argues that the habit of pitching balls wide of the plate in order to help the catcher's throwing is a handicap for the boxmen.

The new plan has been successful so far, inasmuch as the Brooklyn pitchers have displayed increased effectiveness. Dahlen's idea is to limit the chances for bases on balls as much as possible and to make the batemen hit. will be required for telephones in a big office building which is being built in New

Boats and canoes.

The Gloucester, Mass., Times, of the 10th, says:

The opening of the boating season has been accompanied by the usual list of fatalities. From more than one city and country place there has come already she stories of the deaths by drowning. Many of the victims are adults, as usual. It seems impossible for cities to be rid of the men and women who think that the funniest thing in the world is to move aboost reckiessly in a boat or canoe. It secually hard to climinate the people who fancy that they are entirely fit to operate a canoe, containing a girl, although they have had no previous instruction. Every year there are many accidents on the Charles River, for instance, because of the fact that people either did not know how to manage cances, or were cances with them.

But the season this year has resulted already in the death of a number of children. Less than a week ago, some boys in Boston took some of their companions out in a boat the lesson is shyloms enough. We do not know what parents can be thinking of to let children go out in a boat with the same fate. In these cases the lesson is shyloms enough. We do not know what parents can be thinking of to let children go out in a boat with the fact, when no one can see an accident if the happens. Such folly invited disaster. Moreover, a canoe is far too ticklish a craff for any child who has not been given care ful and thorough training in its use, and who does not know how to swim well.

Feobably warning is useless. The sum-

mer will see many more children brought take such peril of their lives. Sometimes it will be through no fault of the parents. Sometimes it will be through no fault of the parents. Sometimes if will be through the thought lessness of the elders. Therefore, it would lessness of the elders. Therefore, it would be well that warning should be given now. Sorrow for an event that might have been averted is very distressing.

Among the bills passed at the session the Legislature just closed was one grant-ing the franchise to all persons over 21 years of age who are bona fide contribuors to the revenue of the town of Dar mouth by way of taxes of a sum not less than \$2 for each and every year. After the bill was brought before the Legislature was amended so that such persons whose taxes were unpaid in December pre-peding the day of election will not be allowed to vote. This means that all poll tax payers are entitled to a vote for mayor and aldermen in Dartmouth in future. A number of persons have ascended the big chimney at Woodside, but none perhaps showed so much nerve as a young lady who ascended a few days ago. The lady referred to, accompanied by a lady friend, decided to take a trip up the high chimney. On arrival at the top, she not only walked around it once, but several times, and at one time went to the edge and peered from the dizzy height to the ground below. This is a feat which many men would not venture to perform, and shows the strong courage of the lady who did its. ax payers are entitled to a vote for mayor
