

## The Rendezvous of Good

The earth is being torn by Armageddon, the great conflict between the positive forces of good and the negative forces of evil.

It is not necessary for the moment for all progressive world citizens to agree in detail upon all subjects, in order to work together for the establishment of righteousness on earth.

The fields of grain must first be saved from the destroyer before there can be need of final winning of the grain.

In the crucial hour the world is coming to recognize the uplifted standard of THE CHRISTIAN SCIENCE MONITOR, international daily newspaper.

The Monitor is standing firmly with democracy against autocracy, with abstinence and sobriety against license and insobriety, with the cause of equality for the sexes against the forces which seek to perpetuate the disfranchisement of woman and with the cause of medical and religious freedom against the reactionary elements of organized medicine and proscriptive religion.

The Christian Science Monitor, 3c a copy, is on general sale throughout the world at news stands, hotels and Christian Science reading-rooms. A monthly trial subscription by mail anywhere in the world for 75c, a sample copy on request.

## The Airship and the Screen

SHALL Canada become an air nation? What is the future of aviation in this country? Nobody knows. But it is anybody's game to predict. And the writer of "The Jitney in the Clouds" in this issue has taken his own methods of prediction. Wabigo is a Canadian city. Perhaps you are interested in problems such as Wabigo had. Perhaps off-hand you don't see much connection between a cow-shed and an air-drome. Neither did Abner Lee when he lived on Gable Street, Wabigo. How he lived to see the cow-drome makes a story which should interest all those who are honest enough to confess that they don't really know what commerce and industry will do with aviation when the war is done monopolizing the airship. We expect to continue featuring the airship in Canada as part of our programme of the future. And Merrick R. Nutting's story of How the Film Industry became what it is to so many millions of people, is the first in a series of expert articles on this ultra-modern subject.
