

WHITE LEAD.

There is in this paint a great difference in qualities, more so than in any other paint, and our aim has been to secure and offer to our customers the best value for their money, by keeping only qualities which we can guarantee as UNIFORM and be depended upon at all times for **STANDING** and price.

This we are now able to do, as we have it made for our trade, and we unhesitatingly offer our

"IMPERIAL GENUINE" and "IMPERIAL"

WHITE LEADS as the best value in the market, and recommend them to all about to paint.

These names and qualities we have secured to us by "Letters Patent," and it is to our interest to **KEEP** the qualities as represented.

PAINTS AND OILS.

In this department our stock is always replete with the very best qualities of colors, dry and in oil, various makers; Linseed oils, boiled and raw; Turpentine, Varnishes and Japans. Our long experience in this branch of our business enables us to advise our customers as to colors and mixtures at all times to their advantage.

Mineral Paints

In various shades of Drabs and Browns. The manufacture of this class of colors from our native minerals is a new branch of Canadian industry, from these are produced many of those beautiful tints used in painting Villas and Cottages. In mixtures with White Lead a cheap and durable paint is made.

WINDOW GLASS.

All sizes from $7\frac{1}{2}$ x $8\frac{1}{2}$ to 32 x 42; larger sizes supplied to order in various qualities.

Paints for Floors, &c, mixed to order at the shortest notice.
