

FIG. 6. (Full Size.)

In every instance the clay vessels are round bottomed, and this seems the more singular in the case of those that are formed, as is supposed, without the aid of any enclosing wicker.

FIG. 7. ($\frac{1}{4}$ Size.)*

Fig. 7 is an almost perfect, but somewhat rudely-formed clay pot, from the Erie shore east of Port Colborne, where it was found, projecting from a sandbank, by Mr. Cyrenius Bearse.

* " $\frac{1}{4}$ size" means that the cut is only half as long and half as wide as the object. "1-16" one-fourth as long and one-fourth as wide.
