-JUST ISSUED-

Poultry Feeding and Fattening

A handbook for poultry keepers on the standard and improved methods of feeding and marketing all kinds of poultry.

The subject of feeding and fattening poultry is prepared largely from the side of the best practice and experience here and abroad, although the underlying science of feeding is explained as fully as needful. The subject covers all branches, including chickens, broilers, capons, turkeys and water-fowl; how to feed under various conditions and for different purposes. A great mass of practical information and experience nor readily obtainable elsewhere is given, with full and explicit directions for fattaing and preparing for market. The broad scope of the book is shown in the following

TOLTON'S No. 1 Double Root Cutter

Points of Merit:

1. To change from pulping to slicing is but the work of a moment. There are two separate wheels, one for pulping

and the other for slicing.
The united force of both wheels is always used in

doing the work in either capacity. The hopper is between the wheels, and does not
