## GOSSIP.

From Mr. John Gardhouse, Highfield, we recently received the following interesting news: "Imp. Scottish Prince, which arrived home from quarantine a short time ago, is doing well. He was bred by Mr. Alex. Watson, Auchronie, Skene, Aberdeen, Scotland, and belongs to his well-known Magazine family. His sire, Golden Champion (78977), was bred by Mr. Wm. Duthie, and is a worthy son of the famous Lovat Champion (74948). From his breeding and general appearance, we think he will make a worthy successor to Imp. Prince Louis; our present stock bull, which we are still using among the older cows, but will offer him for sale in a short time. Our stock is in excellent condition, and have wintered well. Sales have been good. All our young bulls are sold. We still have a number of young cows and heifers, which we are offering for sale at the right prices, bred to imported bulls, Prince Louis and Scottish Prince."

## MAMMITS OR GARGET.

Symptoms and Treatment of the Disease.

THIS disease is an inflammation of the udder or mammary gland. Inflammation of the udder usually results from blows or injury or lying on cold ground; from only partially taking the milk; from exposure to cold; sudden change of food; overfeeding of milk-producing materials; allowing animal to go for too long a period without milking.

Symptoms.—In severe cases, the disease comes on with a chill and swelling of the udder, which is hot and painful and hard to the touch. The breathing is increased, and the temperature of the body is raised, and the animal evinces great pain.

Treatment.—In severe cases, a physic should be given at once, unless the bowels are already quite active. A pound of Epsom salts in a half gallon of warm water should be given as a drench. The drench should be administered slowly.

If there is much pain and the temperature runs high, ounce doses of sweet spirits of nitre with fifteen drops of tincture of aconite root should be given every four hours until the temperature is reduced. The udder should be bathed frequently with warm water, and all the milk possible drawn at least three times a day. The udder should also be gently hand rubbed.

Support to the udder by a wide bandage passing under the udder and fastened up over the back will also be of great advantage. Holes should be made in the bandage for the protrusion of the teats. An ointment made of a dram of solid extract of belladonna and a dram of gum camphor rubbed up in two ounces of vaseline gives excellent results in allaying pain and inflammation.

Throughout the treatment of garget or mammitis tonic doses of Dr. Hess' Stock Food should be given. The amount given is small—one to two tablespoonsful—it tones the vital organs and establishes good health.

In every package of Dr. Hess' Stock Food is a little yellow card entitling the purchaser to free consultation with prescriptions from the eminent veterinarian, Dr. Hess.

Dr. Hess is a graduate of famous medical and veterinary colleges; therefore, no unprofessional manufacturer can equal Dr. Hess' Stock Food; 100 lbs., \$7.00; 50 lbs., \$3.70; 25 lbs., \$2.00; 12 lbs., \$1.00; 7 lbs., 65 cts. Fed in small dose. Sold on written guarantee.

Dr. Hess has written a book on the diseases of stock and poultry—the only complete treatise for farmers and stockmen. Consulted and commended by leading veterinarians.

Write and state what stock you have, what stock food you have fed, also mention this paper. Address Dr. Hess & Clark, Ashland, Ohio, U. S. A., and you will receive one of these valuable books free, postage paid.
