

Three and a Half Miles of the Best Earth Roads in Lincoln County, Ont.

Road being dragged for the third season by D. H. Moyer, who has had his beat graded by the township on condition that he was to maintain it without charge for five years. Note that the drag is being run backwards to smooth down and spread the small ridge of loose earth left at the last time across.

Half-mile on the Fly road dragged by J. M. Wismer. This road was too wide and was in many places ridged in the center, but flat between center and shoulders. Has been narrowed from 36 to 30 feet, shaped up nicely and kept smooth, all with the King ditcher and the split-log drag. Note the lift-lever on drag, devised by Mr. Wismer.

A road in the making. Five-eighths of a mile that has been greatly improved by Angus Stewart. Disk marks show on side where the loosened earth has been drawn to the center with the drag.

Half-mile of good clay road dragged by Frank Love. The camera has exaggerated the slight imperfections along the track.

Cherry Avenue—a mile of splendid clay and sand road dragged the third year by W. J. Stattenhouse, whose farm at the north end of the beat is bordered by rows of cherry trees. This road has been graded from a rut condition with the split-log drag, and maintained like a turnpike. Also graded last year.

Half-mile of beautiful earth road improved by H. Culp. Furrows shown on right of picture have presumably been plowed away for the purpose of narrowing the road. Mr. Culp has done a great deal of work putting this road in shape, and its condition is even better than the cut represents.
