make this auxiliary a success and an influence in the community.— E. J. J. Coult, Alberta.

### Splendid Year's Work

The Annual Meeting of the Caldervale Homemaker's Club, was held at the home of Mrs. Wm. Potter, on March 27. The following officers were elected for the coming year: President, Mrs. R. A. McLeod; vice-president, Mrs. George Bennett; secretary-treasurer, Miss Clara Sharman; club reporter, Miss Edith Bennett. The club begins the year with a membership of 13.

The following is the report given by the secretary-treasurer of the work done during the 15 months ending March 27, 1918:—

During the 15 months there have been 14 regular and five special meetings held. At eight of these meetings the time was spent in quilting, with just a few minutes for business. At the rest it was usually business first and then a short program. At all of them a social time was spent over the cup of tea provided by the hostess. As a result of our labors ten quilts were made which, when sold, brought in the sum of \$54.00.

A collection for the patriotic work of the club, taken up at each regular meeting, amounted to \$81.60.

In June the club sent Mrs. E. J. Smith as their delegate to the convention at Saskatoon, of which she gave an interesting report at the July meeting.

In July the club sent a number of articles to the Red Cross Exhibit at the Provincial Fair at Regina, and were fortunate enough to secure a prize of \$3.00 for a dressing-gown made by Mrs. Beattie.

At the Caldervale school picnic in July, the club took charge of a booth and cleared almost \$100.00 for the Red Cross Fund.

During the 15 months the following articles have been made and sent to the Red Cross Society: 54 pairs of socks, nine trench caps, 10 pairs wristlets, 22 suits of pyjamas, 17 housewives, four mufflers, three flannel shirts, two dressing gowns, one pair of bed socks, 12 dozen cheesecloth handkerchiefs.

Also 85 pairs of socks have been bought and sent out as field comforts to our Canadian soldiers in the trenches. Besides this the club has packed and sent out to the boys from our own district who are at the front, 78 boxes and two comfort bags. Most of these have safely reached their destination and have been gratefully acknowledged.

Twice, during the 15 months, the club has sent out an appeal, by letter, to the men of our district, with the result that the sum of \$150.85 has been donated to help with our patriotic work.

The total amount of money raised was \$484.40, of which over \$400 was used for patriotic purposes as follows:— To the Canadian Red Cross Fund, \$96.00; French Red Cross Fund, \$7.25; Belgian Relief Fund, \$25.50; Agricultural Relief of the Allies Fund, \$50.00; Materials for Red Cross Work and Field Comforts, \$114.16; Boxes to France, \$91.91; Overseas Y.M.C.A. Fund, \$25.00; making a total of \$409.82.—Clara Sharman secretary-treasurer Homemaker's Club, Theodore, Sask.

### Club Briefs

A meeting of Sister U.F.W. was held on April 10, at which Sunday School Work and Church Work were the principal subjects discussed. The matter of Red Cross work was also taken up. This local held a supper last March for the benefit of the Red Cross at which \$40.45 was taken in. The school children provided a very interesting entertainment on this occasion, under the able direction of Miss N. Reist, to whom great praise is due for the manner in which it was conducted.

Mrs. I. H. Lewis has sent us a brief report of the activities of Willow Hollow U.F.W. during the first few months of 1918. During February and March the members sewed 265 articles for the Red Cross, besides which \$11.20 was donated to the Belgian Relief Fund, \$21.00 to the Red Cross and \$24.00 to the Halifax School for the Blind.

## Insure Safety on the Inside!

Think of your family being endangered by falling plaster (as frequently happens when old-fashioned lime mortar is used). Imagine the destruction to your fine furnishings. You don't want this to happen, so in preparing plans for your future home safeguard your family from possible injury by specifying Gypsum Wall Plasters.

Whether the Plastering is to be used on wood or metal lath, or Gypsofibre Wall Board, remember that the only Perfect Wall is a Well Plastered Wall, and Gypsum Wall Plasters are the Only kind of Plasters used by Builders who know best.

## Wood Fibre and Hardwall Plasters

which are made principally of calcined Gypsum (pure Plaster of Paris) have a Tensile Strength that is Two Hundred Times Stronger than Lime, and the cost is no higher when all the saving features are considered.

Wood Fibre and Hardwall Plasters are absolutely Fire Proof—also Vermin, Rat and Germ Proof; and being Non-conductors of Heat and Cold make Buildings Warmer in winter and Cooler in summer. Wood Fibre, Hardwall and Finishing Plasters are sold everywhere in Western Canada.

Ask your nearest Lumber or Building Material Dealer for Descriptive Literature and Prices.

## CATER'S WOOD PUMPS

Will stand more frost, pump easier, last longer, cost less, in wells not more than 40 feet deep, than any pump made. For Deep Wells get Cater's Fig. 720. "So easy to put in and so easy to repair." A full line of Gasoline Engines, Windmills, Water Tanks, etc., kept in stock. Write for Catalogue G. Address: **H. CATER,** Dept. G. BEADON, MAN.

## MUSIC TAUGHT FREE

By the Oldest and Most Reliable School of Music in America—Established 1895

Piano, Organ, Violin, Mandolin, Guitar, Banjo, Etc.

See how easy music can be taught. The lessons are so simple that you can learn to play in a few days. Write for Free Booklet, which explains everything in full.

AMERICAN SCHOOL OF MUSIC, 87 Lakeside Building, CHICAGO

**IF IT LEAKS Get MENDETS**  
They mend all leaks instantly. For gas, water, steam, oil, kerosene, etc. No solder, no rivets, no glue. No work. No mess. No danger. No expense. Complete 1/2 doz. sets, 25c. Postage 1/4. Write: COLLETTE MFG. CO., Dept. M., Minneapolis, Minn.

### Building a Warm House

Depends, to a large extent, on the kind of building paper you use. The perfect building or sheathing paper must be tough and dense to resist the force of our high prairie winds. It must also have permanent moisture-resisting qualities to keep out dampness and frost. Plain building paper (not tarred) is intended only to check the wind. It is made from common paper and absorbs moisture like a blotter. Common tar paper (ordinary building paper saturated with tar) will resist wind and check frost as long as it is fresh. Tar, however, evaporates fast. Tar paper dries out within a few months after being applied to the building, becoming dry, brittle and porous.

**"SOVEREIGN" Sheathing Felt**  
(Trade Mark Registered)  
Made in Canada from Start to Finish

This is the ideal sheathing material. It is made from rag felt, not common paper. It is treated with asphalt, not tar. Rag Felt has higher absorbing properties than any paper made and so contains the maximum amount of moisture and frost-resisting material. It also offers the greatest strength and resistance to the wind. Asphalt differs from tar in being a mineral substance. It will not evaporate. Substances treated with it are odorless, germ and vermin proof, are hygienic and sanitary.

"SOVEREIGN" SHEATHING FELT will last as long as your building—will remain permanently fresh and will give you a wind-proof, moisture-proof, and frost-proof house.

Send for our new booklet: "Why Buildings Properly Sheathed are Easily Heated." It explains the How and Why. We will also send free samples of "SOVEREIGN" SHEATHING FELT or of our other asphalt-treated building materials, such as Ra-ber-oid Processed Roofing, Ra-ber-oid Wallboard, or Asphalt Slate-surfaced Shingles.

Write to-day for these samples and this interesting and instructive booklet. They will demonstrate how you can add to the comfort of your home and at the same time reduce your fuel bills.
