

HARVESTING THE HAY CROP

There is no operation on the farm so dependent upon weather conditions as that of hay making, and the farmer who can always gather in a crop of juicy fodder, neither too young nor too ripe which will come out of the mow fragrant and palatable, needs to exercise his best weather wisdom with good judgment, and lots of snap when the work is rushing.

All grasses and clover make the best fodder if cut while the stalks, having obtained their largest growth, are yet full of sap. If a large area is to be cut, it will be necessary to cut some part before it is ready, to avoid having a large quantity grow too old and woody before it can be reached.

In the maritime provinces, where many mornings are apt to be overcast and there may be some doubt up till eleven o'clock what the afternoon will bring forth, weather wisdom is especially required and frequently use can be made of the meteorological service to advantage. It must be borne in mind, however, that even the official forecasts on the sea-coast cannot be as accurate as at inland points because no reports are available as to weather prevailing far out from shore; therefore the meteorological Bureau only knows what is happening on one side of the district instead of all around it.

In the early part of haying and especially during the first part of a week it is generally good policy to cut down well in advance of the housing strength of the hay crew so that the largest possible quantity of hay may be housed before Saturday night.

The preferable times to cut grass are after the dew is off until, say, eleven o'clock and again after 4 p. m. When cut late in the evening the grass will be green and the night's dew will not blacken it. The best fodder cannot be made without cutting the hay for one night before it is housed. Very many men are content to leave their hay in windrow, or even lying flat, over night and save all the

ABLE TO DO HER WORK

After Long Suffering Mrs. Peasey Restored to Health by Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I suffered with irregular menstruation, was weak and run down, could not eat and had headaches. The worst symptoms were dragging down pains, so bad I sometimes thought I would go crazy and I seemed to be smothering. I was in this condition for two or three years and could not seem to work. I tried all kinds of medicines and had been treated by physicians but received no benefit. I found one of your booklets and felt inclined to try Lydia E. Pinkham's Vegetable Compound. I received the best results from it and now I keep house and go out to work and am like a new woman. I have recommended your Vegetable Compound to my friends and if these facts will help some poor woman use them as my plea."—Mrs. J. F. PEASEY, 387 King St., Toronto, Ontario.

If you are one of these women do not suffer for four or five years as Mrs. Peasey did, but profit by her experience and be restored to health.

OTHER TABLETS NOT ASPIRIN AT ALL

Only Tablets with "Bayer Cross" are Genuine Aspirin

If you don't see the "Bayer Cross" on the tablets, you are not getting Aspirin—only an acid imitation.

The "Bayer Cross" is your only way of knowing that you are getting genuine Aspirin, prescribed by physicians for over nineteen years and proved safe by millions for Headache, Neuralgia, Colds, Rheumatism, Lumbago, Neuritis, and for Pain generally. Made in Canada.

Handy tin boxes of 12 tablets—also larger sized "Bayer" packages can be had at drug stores.

Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monoaceticester of Salicylic acid.

While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company, Ltd., will be stamped with their general trade mark, the "Bayer Cross."

ROYAL YEAST CAKES RICH IN VITAMINES

MADE IN CANADA
The importance of Vitamines in food is being recognized at the present time to a greater extent than ever before. It has been conclusively demonstrated that yeast is rich in this all important element. Many people have received great benefit physically simply by taking one, two or three Royal Yeast Cakes a day. Send name and address for free copy "Royal Yeast Cakes for Better Health."

E. W. GILLE COMPANY LIMITED
WINNIPEG TORONTO CANADA MONTREAL

labour of colling up and opening out the coils next morning, but such methods may blacken 50% or more of the hay and damage both its palatability and nutritive qualities as well as lower its sale value.

In heavy grass with a smooth bottom the side delivery rake and the tedder are two worth while implements. The binder is not likely to be found of use except when the crop is to be cut into the silo, for sheaves of grass cut as young as it should be, will never in our Maritime climate dry through molding badly. Cotton caps for coils can be used in bad seasons with great advantage, but it is doubtful if they will ever come into general use on account of the expense involved. A hay loader in a small crew may be of great advantage; in a large operation its use is problematical, but unloading in the barn by horse power greatly increases the man power of the crew. The wise hay maker will put his hay in the mow green, sappy, but well cured after an night's standing in the coil, and he will make every effort to prevent its becoming wet with rain. In bad seasons it will often pay to spread salt in the mow while the hay is unloading at from 25 to 50 lbs per ton.

Trying To Find Cure For Elephantiasis

Vancouver, July 12—In order to study the terrible tropical disease of elephantiasis, an unnamed Canadian physician in Samoa has just had himself inoculated by bites of mosquitoes that had fed on men suffering from the malady. Captain David Ritchie of the Canadian-Australasian freighter Wairuna, told on arrival here of his talk with the plucky Canadian scientist who has dedicated his life to find a cure.

In the tropics the natives of many countries are subject to the terrible elephantiasis. Science has striven for many years to find the remedy, but to no effect.

Carried by Mosquitoes
It has been learned that the germs are carried by mosquitoes, and that inoculation occurs when a mosquito feeds on its victim. The disease carrying pests are confined to those that have first fed off an elephantiasis sufferer and transmission of germs can only take place on the twenty-first day after the insect has bitten the diseased person. Life of many mosquitoes is no that long; still there are enough whose span of existence permits them to carry the deadly germ.

The doctor told Captain Ritchie that he would be better able to study the progress of the malady if he were suffering from it himself. He could watch every phase of development and would thus be in better position to find a cure. It takes from nine to ten months to develop. If the scientist can not solve the problem he has set before himself he will eventually suffer the terrible end that comes to all elephantiasis victims.

It's hard to say no to a persistent salesman sometimes. If you do manage to say it he doesn't take you seriously.

GET DOWN TO BRASS TACKS

We challenge the Hon. T. A. Crerar and the Hon. Mackenzie King—if they want to be fair to the people—to discuss the public issues squarely instead of talking in a circle.

The discount of our dollar in the United States is the biggest question in Canada today, yet both these gentlemen are silent about it. We insist that they discuss it. As leaders of political parties and would-be Premiers, the people have a right to demand an expression of their views; have a right to know their opinion as to the effect their policies would have on exchange with the United States.

We challenge both of them to dispute:—

1. That under free trade or lowered tariff the importations from the United States would be larger.
2. That increased importations from the United States would mean an increased balance of trade against us, especially in view of the raising of the U. S. Tariff walls against our food products, which have constituted our main exports to that country.
3. That an increased balance of trade against us would necessarily mean an increased discount of our dollar and a corresponding increase in the prices of nearly all commodities to the Canadian people.
4. That by importing less from the United States of the goods we can produce at home we would help to restore the rate of exchange, and at the same time give additional employment to Canadian workmen.
5. That if their policies were carried out the discount of our dollar in the United States would become greater and greater and would be absolutely ruinous to the country.

We have another request to make of these gentlemen. We ask them to take the National Financial Statement in hand and tell us definitely, and especially, in detail, how they, or either of them, would construct the National Budget; how they would raise the necessary revenue, what amount, if any, from Customs, what from Excise, to what extent, if any they would restore the Business Profits Tax, what expenditures they would lop off, what they would do with the railways? The public have a right to know what these gentlemen and their parties think about these matters. The public have had a bitter experience with the former Government in Ontario, which has doubled the expenditure and ruined the credit of the Province, and they do not propose to take any chances in the far larger and greater Federal field.

It will not suffice for Mr. Crerar to talk land tax, the idea of which was exploded even by his own advisers. The people want something definite and concrete. The big problem of the Canadian people is how to make bread and butter and keep the Nation's head above water, and the very least that can be expected from men who aspire to the Premiership is that they explain how they would accomplish these objects, and that they do their explaining in such a manner that the people can understand.

No Time For Change

We would respectfully ask Mr. Crerar and Mr. King to discuss on the public platform the essentially sensible proposition put forth by the Government that in view of the very abnormal and economical trade situation of the world this is the worst of all possible times to consider a revolution in our fiscal system such as these gentlemen advocate.

Just about the time a suburbanite feels as if he would like to spend an evening sitting in the porch swing the lawn needs mowing.

HAY CROP IS ABOUT FIFTY PER CENT IN QUEBEC

Quebec, July 12—Reports from the provincial experimental farm state that rains were of considerable benefit to the crops but fell short of what was needed. Though conditions at the farm were characterized as good, in view of the usual drought, figures were given which indicated that prospects for this year are the worst for a period of 20 years.

The hay crop is but 50 per cent of the average while the grain crop is about seventy-five per cent below the average.

THE BOY SCOUT ASSOCIATION

The Boy in the Man meets the Man in the Boy

There is only one way to be reasonably sure that we are going to see our sons safely over the rough places in their lives, and that is by becoming their chums. We must not allow our waking hours to be so full of business that we shall lack time to help the boys fight those battles every lad must face. The boy within the man must come out to meet the man who is within the boy and they must walk, talk and play together.

Charlie's Case

The following anecdote, though usual, contains a note of warning to which every father should give heed: A prominent Canadian Judge of a Juvenile Court tells of a visit which he made to a place of detention, where he became interested in two bright looking boys of about sixteen years of age. In conversation with one, he said: "Charlie, how did you come to get into this trouble. I knew your father well. He was one of the best ministers in Canada. It must have broken his heart to see you going wrong. Why didn't you take him into your confidence when you found yourself slipping?" The boy hung his head and mumbled: "I never could get within forty feet of my dad. He was always too busy."

Jim's Case

There was a wonderful similarity between Charlie's case and that of the other boy, Jim, whose father was a writer of legal books. Jim complained that several times when in trouble he had tried to have a talk with his father but was always greeted with "Run away Jim, my boy. I am just in the middle of a very important chapter and I cannot take the time just now to talk to you."

Your Case

Perhaps at this time you are saying: "Yes, I know and I only wish I had more time to devote to my boy, but I seem in that respect to be tied hand and foot. My business takes

ZAM-BUK

PURELY HERBAL—No poisonous matter.
ANTISEPTIC—Stops blood-poison.
SOOTHING—Ends pain and smarting, etc.
PURE—Best for baby's rashes
HEALS all sores.

50c box—All dealers.

WHEN USING
WILSON'S FLY PADS
READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

There is only one way to kill all the Flies

This is it—Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water but not flooded) on the window ledge where the light is strong, leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below.
Put the plates away out of the reach of children until required in another room.

The right way to use Wilson's Fly Pads

me away from home a great deal, or I must attend meetings at night, or I work long hours in the office. My life just now is peculiar."

It was to meet such cases as yours that the Scout Movement was devised by Sir Robert Baden-Powell, who spent years studying every phase of the different movements among boys.

What Scouting is

Baden-Powell says: "Scouting is a game in which elder brothers can give their younger brothers healthy environment and encourage them to healthy activities such as will help them to develop CITIZENSHIP.

"Its strongest appeal is through Nature Study and Woodcraft. It deals with the individual and not with the company. It raises intellectual as well as purely physical or purely moral quantities. At first it used to aim for those ends, now by experience it is known that, where properly handled, it gains them."

Convicts in Portsmouth penitentiary at Kingston are to be given an allowance of tobacco in future. In the past convicts have been punished for having tobacco in their possession and many guards were dismissed for supplying it to them. Now a small quantity is to be supplied to the men each week and those who misbehave are to be deprived of it as a punishment.

Probably nothing makes a girl so angry as the failure of another girl to notice her new engagement ring.

TEACH YOUR CHILDREN the Value of Money

Open Savings Accounts for each one of your children. Insist upon regular deposits from pocket money. Thrift will gradually become a strong trait in each child's character.

There is a branch of this Bank near you and a Savings Department at every Branch.
