Societe St. Jean Bantiste The sixth annual ball of the Societe S Jean Baptiste de Toronto took place last night in Germania hall, Toronto street, There were over 40 couples present. The ceilings and walls of the hall were handsomely decorated with the glorious tricolor of republican France and Chinese lanterns. The members of the Societe St Jean Baptiste in this city are from Lower Canada, principally from Montreal, and their numbers increase annually at a remarkable rate, so that now their society is in a flourishing condition. Their appearance at the hall last night was an indication of the half last night was an indication of this. The officers of the society—Messieurs H Laforce, president, L Charlebois, secretary, and T Bricault, treasurer—spared no pains to make the gathering a success, and they were quite successful. Good music and a good supper were provided. Bon garcons.

Catarrh-A New Treatment. From the Weekly (Toronto) Mail, Aug. 24. Perbaps the most extraordinary success that has been achieved in modern medicine has been attained by the Dixon treatment for catarrh. Out of two housand patients treated during the past six months fully nmety per cent have been cured of this stubborn malady. This is none the less startling when it is remembered that not five per cent of patients presenting themselves to the regular practitioner are benefited, while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissue, Mr. Dixon at once adapted his cure to their extermination—this accomplished, he claims the catarrh is practically curred and the permanency is unquestioned, as cures effected by him two years ago are cures still. No one else has ever attempted to cure catarrh in this manner, and no other treatment has ever cured catarrh. The application of the remedy is simple and can be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment. The citizens of Toronto, as well as neighboring lake and inland cities, have observed the alarming prevalence and increase of that dangerous class of maladies known as throat and lung diseases. Year by year is adding to the army of victims, and new types and phase of these affections are also multi-lying. The reports of the city undertakers will disclose to the inquirer a fearful bill of morfality from this cause alone, nor is the gloomy record relieved by a comparison of results in the oft-repeated trial of the various prescriptions in commen practice. The time-worn customs of bye-gone years, calomel, burning, leeching, morphine, iodine and digitalis, have in each new patient awakened fresh hopes of recovery, hopes, alas, to be blighted as were three in the hearts of patients who hoped and died while using the remedies.

More effectual remedies than those which general.

hopes of recovery, hopes, alas, to be blighted as were three in the hearts of patients who hoped and died while using the remedies.

More effectual remedies than those which generally prevail are called for, and it is to this end and the belief that scientific investigation in one class of complaints will be more certain to attain success in this direction, than by occasional research and observation, while the mind is divided by general practice, that led to the establishment of the Ontario Pulmonary Institute in this city during the year 1881, an institution which does afford the best possible treatment of this class of diseases.

By the permanent establishment of such an institute, invalids can at all times consult the doctor personally—being an advantage that will readily be seen and appreciated by all.

Earnest and persevering investigation and fruitfu experiments with different lemedial agents have within a few years been made by men of eminent scientific attainments, which have been attended with the most gratifying success. By careful research in the paths opened by these pioneers, and by independent investigation through our system of practice, we have obtained results well worthy of public attention, and our course of practice has elicited the attention of many of the best physicians of the day, as well as drawn upon us the gratitude of very n.any persons rescued from disease and death.

The mode of administering remedies by the sys-

of the day, as well as drawn upon us the gratitude of very nany persons rescued from disease and death.

The mode of administering remedies by the system of inhalation is acknowledged by all to be the most reasonable of any ever adopted, and most satisfactory in its results.

Invalids who have failed to derive benefit from medical treatment, and who have made fruitless trials of no-trums of the day, will find in this practice abundant reason for hope, as numerons instances have been reported even of the entire restoration to health of parties in this city and vicinity who have made thorough trial of the remedies, although they had previously been pronounced in an advanced stage of consumption.

Its particular efficiency is especially noticeable in throat diseases, which, if neglected, end in consumption, nasal catarrh, bronchitis, asthma, and diseases of the heart. To this class of cases Dr. Williams gives his individual attention.

Those who desire to consult me in regard their cases had better call at the office for an examination, but if impossible to visit the office personally, may write for "List of Questions" and a copy of my "Medical Treatise," both of which will be sent free of charge. Address
