Walker's Old Whisky.

As we have before taken occasion to remark, the minister of inland revenue deserves well of the country for taking tes through the operation of which

measures through the operation of which the public can now obtain from the dealers semine old whisky, bottled in bond, and with the year of its make guaranteed by the government stamp. In the course of an erhaustive debate on the subject, which took place in the British commons a few years ago, it was conclusively shown, by returence to the highest authorities, that the fusel oil found in new whisky is so much changed or eliminated by age as to become harmless, whereas in its fresh state it is really poisonous to a degree. Scientifio man know for a certainty that the ill ender so freely stributed to alcohol are really caused for the most part by fusel oil, a wry different substance, and having very different properties. In another column will be found the advertisement of Walker & Sons, whose fine old bottled whiskles, with the age guaranteed by the govern-ment, stamp, can now be had from all dealers.

We wish to call your attention to our Mechanical Accountant. It is known as the) investigation of ational Cash Register, and is manufactured at Dayton, Ohio, U. S. A.

The gut on this page represents the 34 size, 16 inches deep, 20 inches wide, and 23 inches high. They are made of either walnut, oherry or mahegany, and are handsomely finished

6

You will notice on the front of the register a double row of keys, a plate glass ing acress the upper part of the cabinet, and underneath the keys a cash drawer. The keys mentioned are marked by German silver plates of different denominations.

350., 400., 450., 50c., 550., 60c., 65a., 70c., 750. 800. 850. 900. 950. \$1.00, \$2.00, \$3.00, \$4.00, \$5.00, \$10.00, \$20.00. The occuntant is operated by pressing the key or keys representing the amount of a sale. By pressing a key you ring an alarm bell, open the cash drawer, record the amount on self adding machinery inside, and raise a tablet, which appears in the plate glass opening. On said tablet are figures one and one-half inches long, in jet black on a white background. These figures show the amount of the sale, and are always the same as the key pressed, and can be seen my place within twenty-five feet of the Register, from in front or behind it. By his means the customer, the clerks, and the proprietor can all see that the right mount is registered. This once done, it is impossible to change the record on the nside. The only time required to make a complete and perfect unchangeable record

believe that we have it, but want you to investigate it, and decide without prejudice of your sales is that taken to press the key, requiring one motion of the hand or finger. for yourself.

It will soon pay for itself by the time it will eave in adding up your cash sales. There are no metal or paper checks to count or record, none to wash and dry to keep from sticking together. As stated, the recording machinery is self-adding. The sales ar gistered so that all required is to unlock the lid, take off your statement shown, and eset the machine and look it, requiring for a day's business of \$1000 or less, about three

It is impossible to do the machine justice by way of description in print, so we will cash ! cash ! becomes a nuisance which none more earnestly than the merchant himself state briefly some of the claims made by us for it, and request that you make a personal would like to see abated. This Register takes the place of cashier and cash boy.
