

BULBS, • FOR • SPRING • PLANTING

For bedding out, or to be kept as a pot plant, the Tuberose is a magnificent plant, flowering in the latter part of the Summer; it is so attractive on account of its pure white double flowers and its rich perfume. The same bulb will not flower again, but a number of small bulbs grow from the old one, which, if taken off and planted next Spring, and kept growing all Summer, may be brought in-

LILY AURATUM.

TUBEROSE (PEARL.) to flower the following Summer. The Bulbs I have for sale are imported fine large Bulbs, started in pots, 15 cents each.
