

THE LITTLE WONDER

—AND—

New Hot Water Heating and Ventilating System.

PATENTED 1896.

As used in Basement.

As used on same level as Radiators.

This Hot Water Boiler and System takes the above name for the following reasons:—

- 1st. It is the smallest Hot Water Boiler in the market, of equal heating capacity.
- 2nd. It is the wonder of all who see it, that such a small Boiler, using so small a quantity of fuel, should heat such a large space and get up the required heat so quickly.
- 3rd. All practical observers wonder at such an efficient, neat and durable hot water heating system being supplied at such small cost.

It costs about half as much as the hot water systems now in general use, and consumes from half to two-thirds the quantity of fuel.

For illustrated catalogues and full particulars of this and our Blast Heating, Drying and Ventilating Systems, address
