## Saved him \$1,800.

ADAMS, N. Y., Jan. 30, 1882.  
Dr. B. J. KENDALL & Co. Gents.—Having used a good deal of your Kendall's Spavin Cure, with great success, I thought I would let you know what it has done for me. Two years ago I had an speedy colt as was ever raised in Jefferson County. When I was breaking him, he kicked over the cross bar and got fast and tore one of his hind legs all to pieces. I employed the best farriers, but they all said he was spoiled. He had a very large thorough-pin, and I used two bottles of your Kendall's Spavin Cure, and it took the bunch entirely off, and he sold afterwards for 1800 dollars. I have used it for bone spavins and wind galls, and it has always cured completely and left the leg smooth.

It is a splendid medicine for rheumatism. I have recommended it to a good many, and they all say it does the work. I was in Witherington & Knosland's drug store, in Adams, the other day, and saw a very fine picture you sent them. I tried to buy it, but could not; they said if I would write to you that you would send me one. I wish you would, and I will do you all the good I can. Very respectfully, E. S. LYMAN.

## Kendall's Spavin Cure.

New Hamburg, Ont. Dec. 28, 1881.

Mr F. H. McCallum, Dear Sir,—The bottle of Dr. Kendall's Spavin Cure bought of you last summer gave me the utmost satisfaction and performed a wonderful cure upon a mare nineteen years old belonging to me, which was badly spavined for ten years. She was so lame that I could hardly get her to move. The lameness is entirely gone after using half a bottle of the cure, and she is like a young horse again. Yours truly, J. F. KOTHI.

## TRAVELER'S FRIEND,

## Portable Door Securer!

We give an engraving of a very compact and convenient device for securing doors, patented by Charles A. Crougey, of Detroit, Mich. It is designed principally for the use of travelers, and is very readily carried, and quickly and easily applied to the door, and when so applied renders the door perfectly secure. When in use, the hook of the metal strip is placed against the jam of the door, and the U-shaped piece is turned in such a manner as to permit the closing of the door, and by closing the door the hook is forced in to the wood of the jam. The U-shaped piece is then turned so that the long shank will rest against the surface of the door. The device does not mar the door, and keeps it perfectly locked, and is applicable to doors of any thickness, having any style of casing.—Scientific American, August 19th, 1882.

Our business through the Grange has been so much beyond our expectations that we have had difficulty in filling all orders for our plows, consequently it has been impossible for us to exhibit them at the different exhibitions this season.

We hope those who were disappointed in not seeing our plows at the various fairs, will accept this explanation, and as our terms on which we send sample
