

COMPANY OVERVIEW

Sonoptic Communications is a wholly-owned division of Sonoptic Media & Communications Corporation established in 1980. Sonoptic Communications offers a range of consulting services to those involved in producing, managing or disseminating information. Sonoptic's professionals, specializing in the process of information technology management, have expertise in print and electronic publishing, audiovisual and educational media, office automation and corporate communications. Sonoptic Communications' corporate philosophy calls for strong identification with a client's goals and a willingness to go the extra mile to ensure client satisfaction.

EXPERIENCE

Collectively, Sonoptic Communications' senior consultants have been involved in over 30 videotex start-ups, one national teletext trial, and the first North American NAPLPS videotex trial. Project capitalizations ranged from \$25,000 to several millions of dollars.

Current clients include:

- Ottawa Info Vision
- Walsh Inc.
- Department of Communications
- Office of the Solicitor General
- Magic Lantern
- Frontenac Institution
- John Howard Society
- Correctional Services of Canada

- Inuit Tapirisat of Canada
- Association for the Advancement of Science in Canada

Sonoptic Communications also provides secretariat services for the Canadian Association for Information Science.

Current videotex projects include the development of an interactive computer-aided learning system having industrial applications, and the documentation, packaging and marketing of a franchise application.

PRODUCTS AND SERVICES

Videotex services include:

- Project management
- Market feasibility analysis
- System specification
- Vendor sourcing
- Content development
- Staff training
- Demonstrations
- Workshops/seminars

FUTURE DIRECTIONS/ TARGET MARKETS

Sonoptic Communications is developing a broad-based service, Information Technology Management, to assist corporations in achieving strategic goals through the use of old and new information technologies. This service will focus on educational and implementational techniques to ensure the orderly development and introduction of information technologies within an organization.
