

NOVEMBER 19, 1948, GENERAL ASSEMBLY RESOLUTION 192 (III)

CONTINUATION OF STUDIES BY COMMISSION FOR CONVENTIONAL  
ARMAMENTS, ESPECIALLY DATA ON LEVEL OF CONVENTIONAL  
ARMAMENTS AND ARMED FORCES

(Adopted at 163rd Plenary Meeting on paragraph-by-paragraph  
vote; Canada against)

The General Assembly.

Desiring to establish relations of confident collaboration between the States within the framework of the Charter and to make possible a general reduction of armaments in order that humanity may in future be spared the horrors of war and that the peoples may not be overwhelmed by the continually increasing burden of military expenditure,

Considering that no agreement is attainable on any proposal for the reduction of conventional armaments and armed forces so long as each State lacks exact and authenticated information concerning the conventional armaments and armed forces of other States, so long as no convention has been concluded regarding the types of military forces to which such reduction would apply, and so long as no organ of control has been established,

Considering that the aim of the reduction of conventional armaments and armed forces can only be attained in an atmosphere of real and lasting improvement in international relations, which implies in particular the application of control of atomic energy involving the prohibition of the atomic weapon,

But noting on the other hand that this renewal of confidence would be greatly encouraged if States were placed in possession of precise and verified data as to the level of their respective conventional armaments and armed forces,

Recommends the Security Council to pursue the study of the regulation and reduction of conventional armaments and armed forces through the agency of the Commission for Conventional Armaments in order to obtain concrete results as soon as possible;

Trusts that the Commission for Conventional Armaments, in carrying out its plan of work, will devote its first attention to formulating proposals for the receipt, checking and publication, by an international organ of control within the framework of the Security Council, of full information to be supplied by Member States with regard to their effectives and their conventional armaments;

Invites the Security Council to report to the Assembly no later than its next regular session on the effect given to the present recommendation, with a view to enabling it to continue its activity with regard to the regulation of armaments in accordance with the purposes and principles defined by the Charter;

Invites all nations in the Commission for Conventional Armaments to co-operate to the utmost of their power in the attainment of the above-mentioned objectives.
